S.D.O. 7, 870.

15th

Sir,

In the indent from the Curator, Government Botanic Gardens, Coimbatore, received with your letter No. 5 of 20th January 1928 demand is made for a pair of "strong beam or other scales with weights, (tripod suspender not required), suitable for weighing bulky and heavy articles such as lime, grass, firewood, potatoes &c." and it is stated that they can be obtained from Messrs Shanks & Co.

Messrs Shanks & Co. have been invited to tender but are unable to do so as they are not makers.

Messrs W. & T. Avery, large makers of weighing apparatus, were then applied to and recommended a weighing machine as shown in the accompanying drawing marked A. The cost of this machine to weigh up to 10 cwt. is however £11 and Messrs Avery were therefore asked to quote for a machine to weigh up to 3 cwt. only which it is thought might be of sufficient capacity. In reply they suggest a machine as shown in the annexed drawing marked B the total cost of which, with the necessary weights to weigh up to 3 cwt. would be £5.18.6. The size of the platform of this machine is 20 ins. x 17 ins.

As the cost estimated in the indent is £3. only, and nothing is said in the indent as to the maximum weight which the scales are required to take, I propose to await an expression of your wishes in the matter before taking any further steps towards a supply.

I shall be obliged by the return of the enclosed drawings with your reply.

I have the honour to be, Sir,

Your obedient servant,

Secretary to Government,
Revenue Department,
Madras.
