that of Cholum in Cuddapah fell by 1 seer. Otherwise the prices were either stationary or the variations were trifling.

Prospects - Prospects continue fair. Agricultural operations are generally progressing under wells, but more rain is wanted for cultivation under tanks. Standing crops under wells are generally good. Pasture is still scanty, but fodder is available. ~~Employment~~ laborers get employment.

Numbers on relief - The number of relief workers fell by 529 while there was a slight increase in the number of persons on gratuitous relief. The decrease is reported to be due to the prevailing harvesting operations. The annexed Statement shows the numbers relieved during the week.

I was no harvesting in Kistna
 as they have now come in from
 Kurnool. There is no other harvesting
 going on in the Kistna
 under the heading of gratuitous
 relief about 1000 persons
 are still in the
 waiting line
 for relief.

These operations cannot well be in Kistna: but in Kistna Kurnool & Cuddapah harvesting operations are going on. Possibly the considerable fall of rain in the affected parts of the dist. may have had some effect.

I think we might ask more information as to the very sudden fall in the 27th inst.

Read season report from Nellore
for the W.R. 7th May 1898.

acc. mis. No. 2081 8/14.5.98.

The sudden fall in the
numbers on relief is stated
to be due to the prevailing
harvesting operations; but
^{appears as} there is little or no harvesting
in Nellore in the month of
May. The collector will be
requested ^{to furnish} a fuller explana-
tion of the decrease
