READ—the following papers:—

From J. C. JOHNSTON, Esq., Executive Engineer, Kurnool Division, to the Superintending Engineer, III Circle, dated 29th March 1898, No. 6942.

With reference to your No. 122 C. of 24th March 1898, I have the honour to invite your attention to this office No. 5482 of 12th January 1898, in which I said that under personal instructions of the Chief Engineer for Irrigation, I have to see whether a line with a greater fall cannot be given to the channel. By omitting to supply one tank—an insignificant one—I find I can have a channel about 12 miles long and with a fall of 74 feet, instead of one 22 miles long and with fall of 41 feet as far as the first tank to be supplied.

2. I enclose a tracing giving the contour of the original proposal starting with a level (M.S.L.) of 903·73 at Lockinsula, the contour took the channel to above the Pedda Mallalammah tank, the level of crest of which is 862·65. The level of crest of the Edula tank just below the Pedda Mallalammah tank is 829·39, and it would be quite sufficient were the new channel brought to a point just above this tank. There would be an increase in fall from 41 to 74 feet and the length would be nearly halved perhaps, as has been pointed out before, the first part of the channel until the tanks are reached would not be remunerative. It is towards the latter half of the channel that the bulk of the good soil lies, and it would be considerable advantage if the first part of the channel could be reduced in length for most of it runs through rock. It is for the purpose of contouring this new channel up to Edula tank that an establishment is required. I cannot recommend the original proposal; there are some pencilled plans connected with it and which I have not submitted because they have not been checked or looked over by me and they have not been checked and corrected because I had no intention of recommending them for sanction.

(Signed) J. C. JOHNSTON,
Executive Engineer, Kurnool Division.

7th February 1898.

No. 47 I.

Copy submitted to the Chief Engineer for Irrigation in continuation of this office No. 125 C. of 25th March 1898. This proposal would reduce the length of the channel by about 10 miles, of which fully nine would be through slaty rock similar to the Lockinsula cutting. If the Chief Engineer considers that further investigation should be carried on, it is requested that sanction to the accompanying proposition statement may be obtained.

4th April 1898. (Signed) J. C. LARMINIE,
Suptg. Engineer, III Circle.

No. 36 E.W.

Forwarded to the Chief Engineer, Public Works Department, with a request that the sanction of Government may be obtained at an early date for the employment of the establishment applied for.

7th April 1898. (Signed) F. J. WILSON,
for Chief Engineer for Irrigation.

From the Examiner, Public Works Accounts, dated 28th April 1898, No. 1404 B./E.

ORDER—No. 1203 W., dated 12th May 1898.

With his endorsement recorded above, the Chief Engineer for Irrigation submits a proposition statement for temporary establishment required for investigation of the Velgode project in the Kurnool division, in which provision is made for one Overseer on Rs. 100, and six peons on Rs. 7 each per mensem, for a period of six months.

2. The Chief Engineer, Public Works Department, will arrange to post an Overseer as early as possible.

3. The entertainment of six peons, on Rs. 7 each per mensem, for a period of six months, is sanctioned.

4. The sanction accorded in paragraph 3 has been registered as Provincial No. 9 W. of 1898–99, and classified as Establishment—Temporary.

(True Extract.)
