To the B'd of Rev (Rev Sett) & L & M. Dept. Dy 25.7.98

Death-rates in the affected Districts of the Madras Presidency.—Recording statement of — for the month of May 1898, with the remark that the increase in the death-rates of Nellore and Bellary during May 1898, as compared with the average for the ten previous years, was insignificant.

21/7/98

PROCEEDINGS OF THE BOARD OF REVENUE

(Revenue Settlement, Land Records and Agriculture).

Read—the following letter from Surgeon-Major H. THOMSON, M.B., D.P.H., Acting Sanitary Commissioner for Madras, to the Secretary to the Commissioner of Revenue Settlement, Land Records and Agriculture, dated Fort St. George, 5th July 1898, No. 1508-S. :—

With reference to B.P., No. 68, dated 8th February 1898, I have the honour to forward herewith the death-rates for the marginally-noted Districts of this Presidency for the month of May 1898, as compared with the average of ten previous non-famine years.

Ganjám.	Kurnool.
Vizagapatam.	Cuddapah.
Bhadráchalam.	Bellary.
Nellore.	Anantapur.

2. The rates have been communicated to the Government of India.

Enclosure.

Special death-rate return for the famine-affected Districts for the month of May 1898.

District.	Calculated on the census population.	Calculated on the estimated population.			
	Death-rate of the month per mille per annum.	Death-rate of the month per mille per annum.	Average death-rate of the month per mille per annum during ten previous years.	Average death-rate of the month per mille per annum during ten previous non-famine years.	Deaths from starvation.
Ganjám	*17·1	..	*26·6	*18·2	..
Vizagapatam	*16·8	..	*15·6	*15·5	..
Bhadráchalam (Gódávari) ..	23·2	20·4	39·8	35·4	..
Nellore	16·0	14·0	15·1	14·8	..
Kurnool	19·0	16·6	26·3	25·2	..
Cuddapah	14·8	13·5	21·4	20·8	..
Bellary	23·1	19·3	22·9	22·5	..
Anantapur	15·9	14·6	20·5	20·2	..

* The rates have been calculated on the census population for which returns were received as it has not been found possible to estimate the population correctly owing to the fluctuations in the populations for which returns were received from these districts. Again the average rates of five years, instead of ten, are given, as the populations for which returns were received are not available from 1892-95.

Resolution—No. 240, dated 8th July 1898.

Recorded with the remark that the increase in the death-rates of Nellore and Bellary during the month of May 1898, as compared with the average for the ten previous years, was insignificant.
