* Under intermediate system.

Condition and prospects of area affected.—The area affected remained the same as in the previous month, but the intensity of distress abated to some extent. There were a few good showers in the affected area; and the average rainfall for the district from 1st April up to 4th June was 2.5 inches as against a normal fall of 1.9 inches. Pasture and fodder are still insufficient, but the recent rains are expected to improve pasture.

2. The prices showed a downward tendency generally: and were cheaper than the scarcity rates at the end of the month.

3. *Nature of works.*—All relief works, which were wholly road works, were carried on under the intermediate system. The numbers on works fell by 27 per cent. during the month. The decrease was due to labourers having found employment on the Madras-Bezwada State Railway and on minor irrigation and Local Fund works now in progress in parts of the affected tracts. The Collector hopes to be able to close the works by the end of the current month. Besides the numbers on relief works, about 100 persons were employed on works undertaken with the aid of State loans.

4. *Gratuitous relief.*—The numbers on this form of relief fell from 64 to 37. The relief was confined to the grant of cooked food to the dependants of workers.

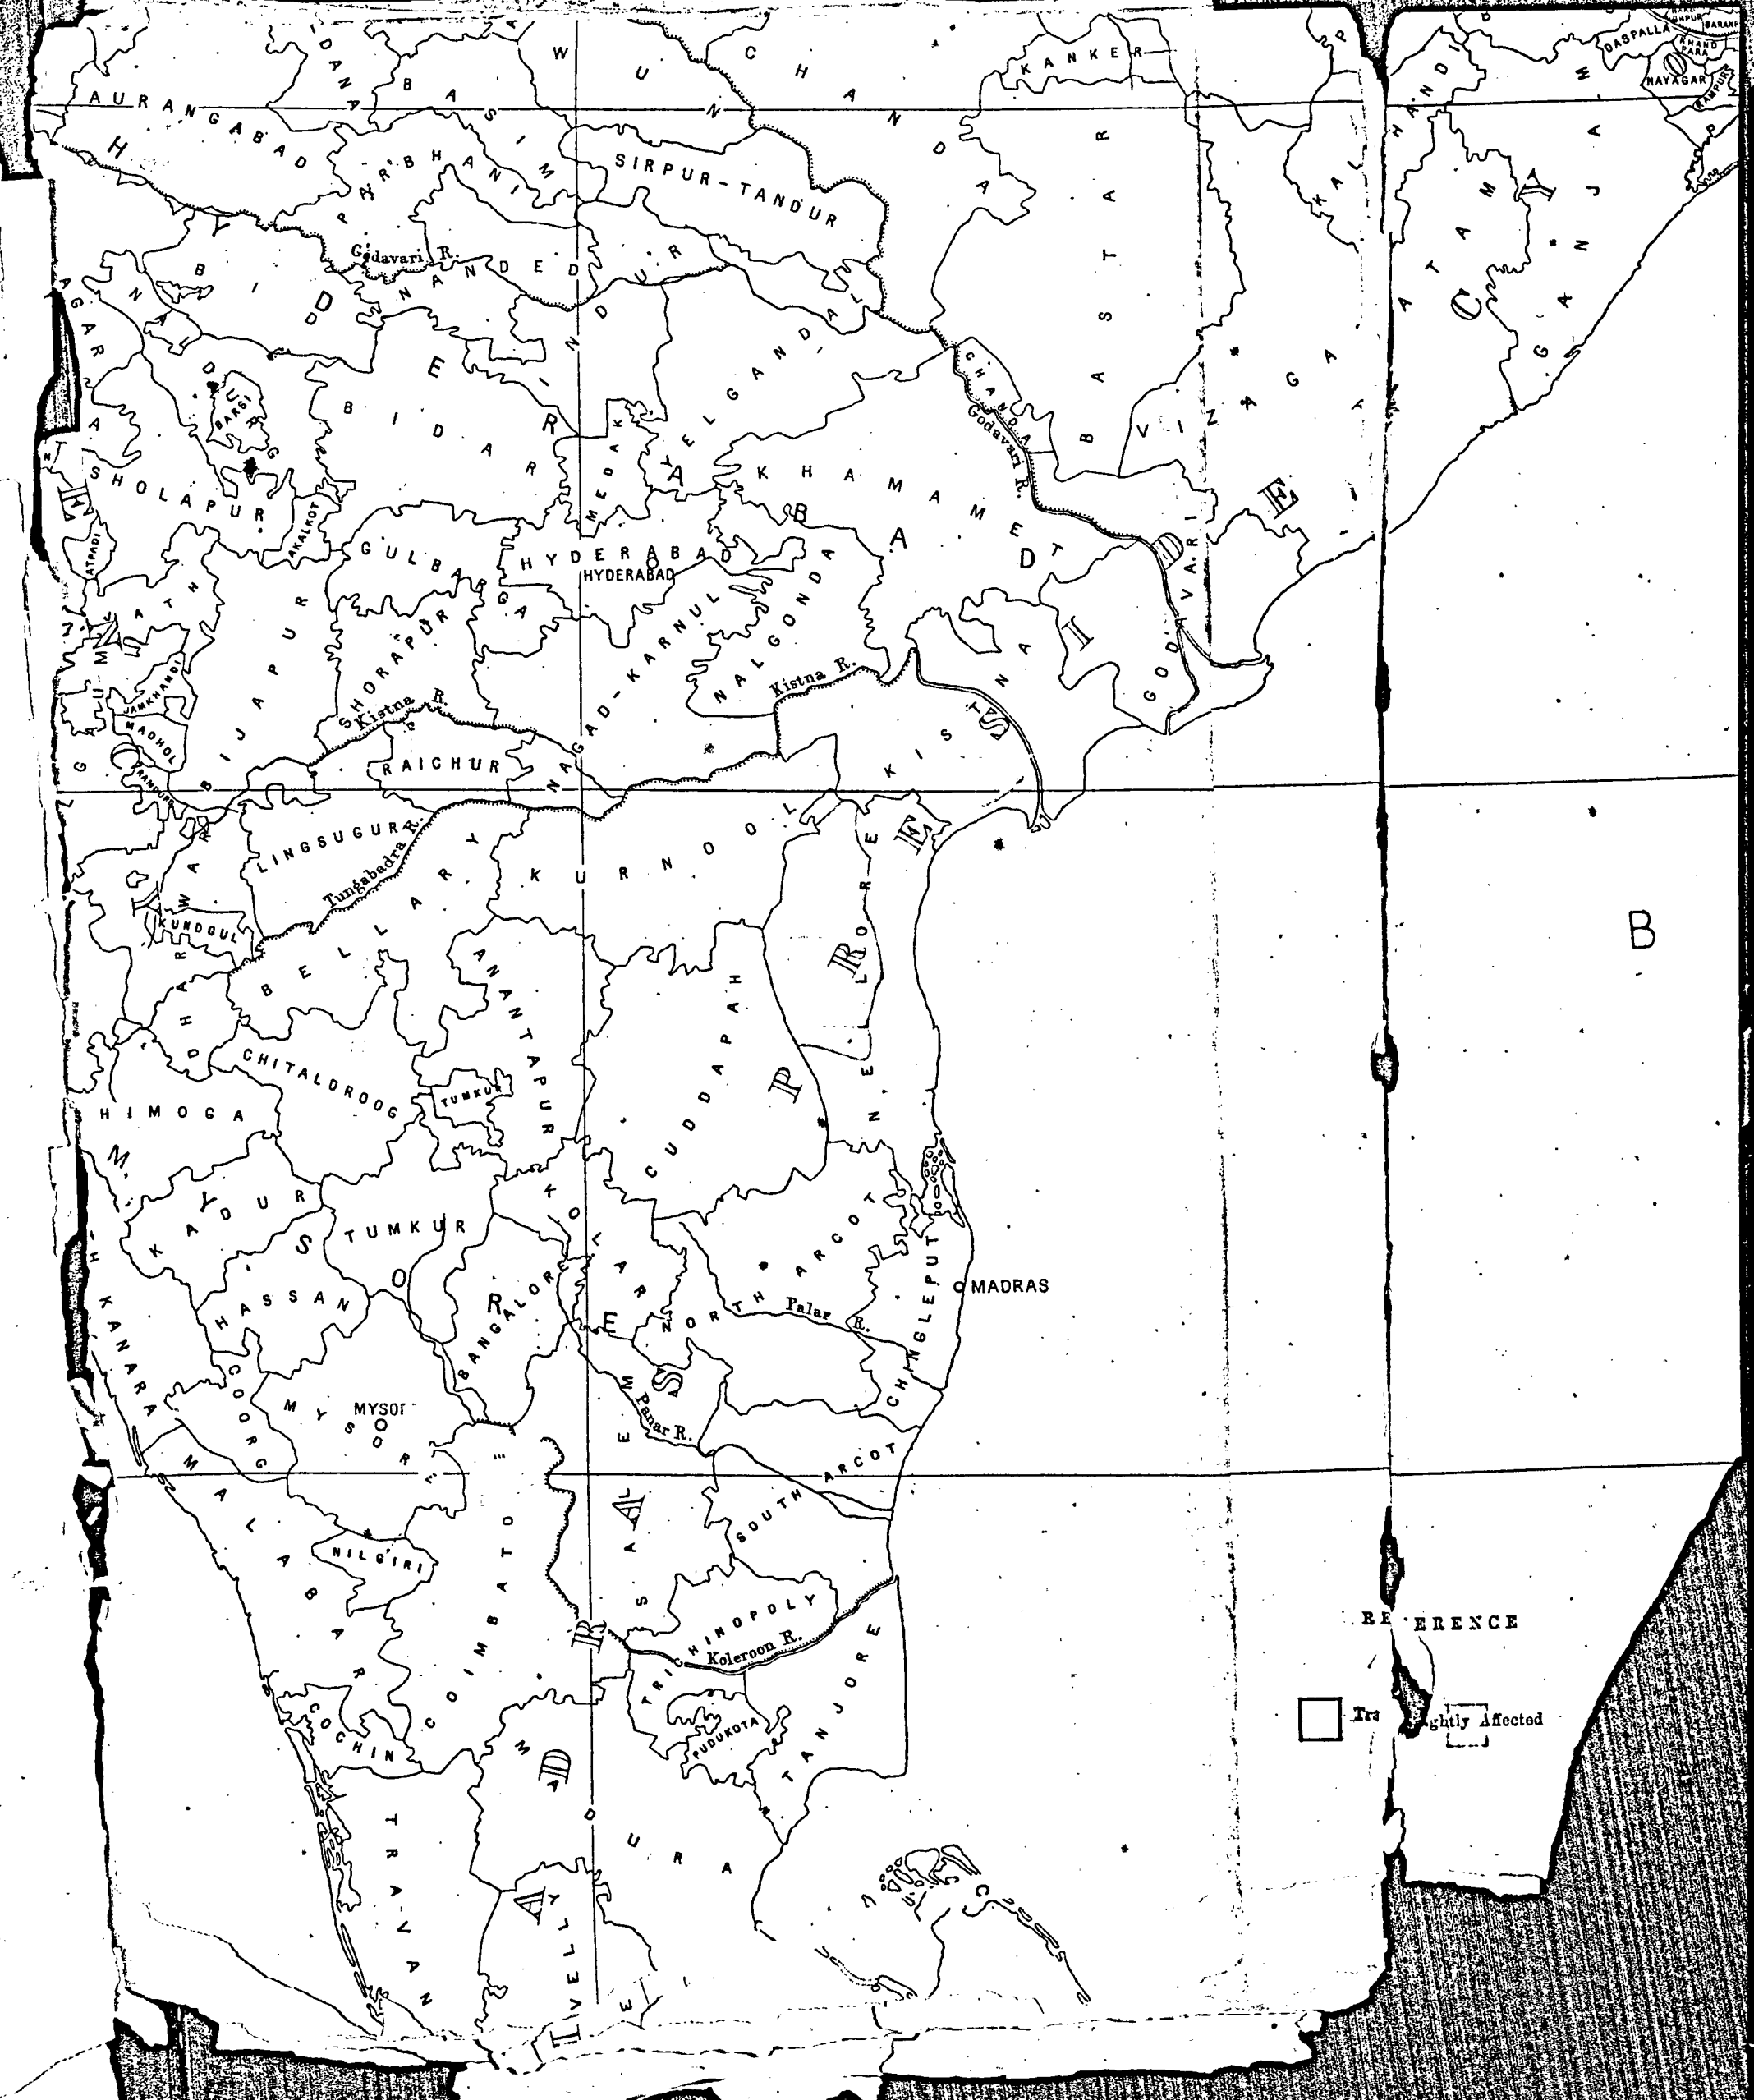

5. The condition of the people was generally good.

6. *Mortality.*—Complete statistics for the month have not yet been received. The figures received for April show that the number of deaths in that month was slightly less than the normal.

STATEMENT B for the period ending 28th May 1898.
