Proceedings of the Board of Revenue
(Revenue Settlement, Land Records and Agriculture)

Dated 21st October 1898.
No. 6231 his

Read following letter from W. Hughes Esq.,
Chief Engineer for Irrigation, No 329 all
dated 14th October 1898:—

With reference to Board's
Proceedings No 343 dated 13th September
98, I have the honor to inform you that
a final decision as to whether further
investigation of the Maithukulam Project
should be proceeded with or not awaits
the result of a reference made to the
Revenue Department on the financial
aspect of the scheme. The Superintendent
Engineer

To 6168
26-10-98

Communicated to H. 20

Engineer Forth Leitch has, in the meantime, been directed to maintain the water registers.

2. Definite proposals will be shortly submitted to Government with regard to the Bharsani Project.

3. An estimate has just been sanctioned by Government for re sluicing the first 15 miles of the Kaliagarogen channel and the Superintending Engineer has been directed to expedite the submission of the estimate for re sluicing the remaining portion of the channel. Until this work has been carried out, and it is seen what water is available, the question of the extension of the channel must stand over for the present.

4. The clearance of silt from tank beds to the extent required to make up the bunds to a good substantial section seemed an excellent form of relief work and has been approved by Government but the clearance of silt merely for the sake of deepening the tanks affords very little return for the labour expended and should in my opinion only be undertaken when no more useful work be found.

A copy of this letter with the Board's Proceedings will be forwarded to the Superintending Engineer with a request that the preparation of the necessary estimates may be put in hand at an early date.

Resolution communicated to #2

the collector of Lohimbator.
