Proceedings, Forest No. 525, 2nd December 1897.

DECEMBER.

Submitting to Government, for approval and publication in the *Fort St. George Gazette*, the draft notifications under section 4 of the Madras Forest Act for the proposed constitution of three extensions (5, 6 and 7) to the Jaggayyapét reserve, Nandigama taluk, Kistna district.

PROCEEDINGS OF THE BOARD OF REVENUE
(LAND REVENUE).

READ—the following letter from the Collector of Kistna, to the Secretary to the Commissioners of Land Revenue (through the Conservator of Forests, Northern Circle), dated 10th October 1897, Dis. No. 937-For. :—

I have the honour to forward herewith draft notification under section 4 of the Forest Act for the reservation of extensions 5, 6 and 7 of Jaggayyapét reserve.

2. When submitting proposals for the Budavada extensions (*vide* Board's Proceedings, Forest No. 278, dated 2nd July 1896), I informed the Board that I proposed acquiring several patta lands which blocked the passage to some of the reserves, as these lands were mostly jungle like those reserves, mostly undemarcated and unsurveyed and their boundaries were difficult if not impossible to fix; that heavy grazing fees were levied from cattle owners whose cattle passed through the patta lands on the way to the Government forests; and that owing to the want of definition of these patta lands, fees were often collected by the pattadars even if the cattle did not pass through those lands. It was further pointed out that if those lands were not acquired, the ryot would not benefit by the small rate of grazing adopted by Government.

3. Of the same kind are the lands included in the extensions now proposed. In extension No. 5 the karnam of Gunduboyinapalem and his relations own a patta for field No. 315-12 in the unsurveyed portion of his village. According to the adangal, it is about half of the unsurveyed waste left out of the reserve and this he admits. But he could not point out the boundaries on the ground and appeared to claim not only the whole of extension 5, but also the southern hilly portion of extension 6, which in reality belongs to Pochempalli village, extension 7 is under very similar circumstances; and from the plan it will be clear how the main reserve is shut off from the Ravirala people.

4. In extension 6, it has been deemed better to bring the forest line so as to coincide with the line of the surveyed boundary of the village in the northern portion of this extension. This is a permanently surveyed boundary and would be far more satisfactory; the line has become overgrown and when cutting afresh it would be as well to adopt the newly proposed line.

5. The lands now proposed to be taken up were excluded at the time of settlement of the main reserve because they were held on patta; but as pointed out by the Board in the Proceedings above quoted, the arrangements at settlement have proved unsatisfactory. This is mainly because, whereas at the time the grazing was leased out and the highest revenue that it would fetch was endeavoured to be obtained, now we are endeavouring to provide grazing for the ryots at as a cheap rate as possible; and if as here happens high fees are charged for the passage of cattle through to the forest, the whole scheme is frustrated.

6. The forest in the extensions resembles that of the main reserve consisting for the greater part of *acacias* (including *acacia sundra*) and *grewias*.

7. The statement of area and condition, ayakat abstract and demarcation certificate are submitted herewith.

RESOLUTION—Forest No. 525, dated 2nd December 1897.

With the letter read above, the Collector of Kistna submits proposals for the reservation of extensions 5, 6 and 7, to the Jaggayyapét reserve, and reports that the reasons adduced by him in his letter disposed of in Board's Proceedings, No. 278, Forest, dated 2nd July 1896, for the acquisition of certain patta lands in the Budavada reserve extension blocks, hold good in respect of the patta lands comprised in the proposed extensions. He also states that the exclusion of some of the fields now proposed to be acquired during the settlement of the main reserve has proved unsatisfactory, as observed in the above Proceedings, inasmuch as these lands which block the passage of cattle to the main reserve preclude the adjoining villagers from grazing their cattle in the main reserve at the cheap rates prescribed by Government. The Board therefore considers that the acquisition of the patta lands in question is desirable in the interests of the public, and accordingly submits to Government the draft notifications under section 4 in respect of these extensions, for approval and publication in the *Fort St. George Gazette*.

4 BOARD OF REVENUE (LAND REVENUE), FOREST No. 525, 2ND DECEMBER 1897.

2. The Collector has been asked to explain why the area under cultivation against Gundaboyinapalem village in the ayakat abstract includes 34 acres of unsurveyed area, while the area against the next village under the same head excludes 75 acres similarly situated.

Resolution—Forest, No. 525, dated 2nd December 1897.

With the letter read above, the Collector of Kistna submits proposals for the reservation of extensions 5, 6 and 7, to the Jaggayyapét reserve, and reports that the reasons adduced by him in his letter disposed of in Board's Proceedings, No. 278,

Forest, dated 2nd July 1896, for the acquisition of certain patta lands in the Budavada reserve extension blocks, hold good in respect of the patta lands comprised in the proposed extensions. He also states that the exclusion of some of the fields now proposed to be acquired during the settlement of the main reserve has proved unsatisfactory, as observed in the above Proceedings, inasmuch as these lands which block the passage of cattle to the main reserve preclude the adjoining villagers from grazing their cattle in the main reserve at the cheap rates prescribed by Government. The Board therefore considers that the acquisition of the patta lands in question is desirable in the interests of the public, and accordingly submits to Government the draft notifications under section 4 in respect of these extensions, for approval and publication in the *Fort St. George Gazette*.

2. The Collector has been asked to explain why the area under cultivation against Gundaboyinapalem village in the ayakat abstract includes 34 acres of unsurveyed area, while the area against the next village under the same head excludes 75 acres similarly situated.
