Submitting to Government, for approval and publication in the Fort St. George Gazette, draft notifications under section 4 of the Madras Forest Act for the constitution of twenty-three blocks, in the Musiri taluk, Trichinopoly district, as reserved forests.

PROCEEDINGS OF THE BOARD OF REVENUE

(LAND REVENUE).

READ—again Proceedings of the Board of Revenue (Land Revenue), Forest Mis. No. 1101, dated 7th August 1896.

ABSTRACT.—Communicating to the Collector of Trichinopoly and the Conservator of Forests, Central Circle, Government Order calling upon the Board to report whether the reservation of the fifteen blocks in the Musiri taluk, Trichinopoly district, proposed to be constituted reserved forests under section 4 of the Forest Act, will not cause inconvenience to the ryots and whether the blocks are likely to be materially improved by such reservation.

READ—also the following letter from BANNATYNE MACLEOD, Esq., M.A. (Barrister-at-Law), Acting Collector of Trichinopoly, to the Secretary to the Commissioners of Land Revenue (through the Conservator of Forests, Central Circle), dated 25th August 1897, R. C. No. 276-For. :—

With reference to Board's Proceedings, Forest Mis. No. 1101, dated 7th August 1896, communicating (a) Government Order calling for report as to whether the reservation of fifteen blocks in the Musiri taluk would interfere with the convenience of the ryots, and also how it is proposed to manage the blocks, and whether protection would improve them, I have the honour to inform you that if the hill blocks are to be improved, they must be kept closed for fifteen or twenty years. At present it is no use attempting to sow or plant these blocks; the original forest has been destroyed and the soil washed away. If the forest is closed, prickly-pear and bushes will spring up and in time afford shelter to the seeds of trees, besides assisting in disintegrating the rocks. The blocks on the plains are all more or less bare; to improve them they must also be closed. As a commercial undertaking, it would probably pay to plough them up and sow avaram (*Cassia auriculata*); there is an increasing demand for this shrub and it is becoming very scarce, especially in Musiri taluk, where fuel is so scarce that it is reported that the people are digging up the roots of avaram and other shrubs. This shrub would also provide shelter for the young trees which would spring up in time. If, therefore, these forests are to be reserved, it is quite clear that the convenience of the people must be interfered with, as, even if no attempt is made at improvement, grazing fees will be charged. This condition must obtain everywhere, where forests are reserved, and is not peculiar to the Musiri blocks alone.

2. Further, in the case of these fifteen blocks as well as the nine blocks, the boundary descriptions, &c., of which were returned by the Board of Revenue with its Proceedings, Forest No. 245, dated 3rd June 1896, the Tahsildar of Musiri and Divisional-officer were requested to make local enquiries after personal inspection of the blocks with the ryots concerned and to find out whether the proposed reservation of the blocks will cause hardship to them by unduly restricting the areas available for extension of cultivation and grazing. The Tahsildar has submitted his report on only seventeen of these blocks and recommends the blocks being reserved for forest purposes after

excluding some portions of certain blocks, as the ryots wish the same for extension of cultivation and for the exercise of communal privileges. In every case the percentage of land left outside the reserve will now amount to 20 per cent. of the occupied area in each village; in some cases it is as much as 40 per cent. In some cases, the ryots have raised no objection whatever to the proposed reservations. As regards the remaining seven blocks, the Tahsildar and Divisional-officer have been reminded to send in their reports, and proposals for reservation will be submitted as soon as these are received.

Endorsement by E. P. POPERT, Esq., Conservator of Forests, Central Circle, dated Camp, Melput, 29th August 1897, No. 447.

Forwarded.

2. There is not the slightest doubt the areas would derive material improvement from protection and it is to the interest of the ryots in the neighbourhood that they should be reserved.

3. At present the bare hills are valueless to everybody, except as standing ground for cattle; unless protected, they will further deteriorate and become useless for even that purpose. If improvement is to be effected, the areas must be closed at all events for some time. The first step as pointed out by the Collector towards their improvement will be the appearance of *Euphorbia*, prickly-pear, &c. To attempt now to plant up these areas would be waste of money. Their reservation cannot be looked upon as a profitable commercial speculation, they will not be a source of revenue to the Forest Department; the cost of settlement, demarcation, &c., will not be recouped for very many years to come.

4. The case of the blocks in the plains is different. There is no necessity to close the whole area. Each should be divided into compartments and only one compartment at a time should be taken on hand. This must be closed to grazing for a time. Strops should be ploughed up and seed of *Acacia leucophlea* and *Cassia auriculata*, &c., be sown in the furrows. In addition offsets, sufficiently long to be out of the reach of cattle, might be put out, these, besides affording a certain amount of shade, would, in a few years, yield leaves for manure, a commodity badly wanted in the taluk.

Reference on the above, dated 23rd September 1897.

The maps and other enclosures returned with Board's Proceedings, Forest Mis. No. 1101, dated 7th August 1896, have not been resubmitted by the Collector with the letter read above. It is also observed from paragraph 2 of the Collector's letter that the Tahsildar of Musiri recommends in the case of certain blocks the exclusion of certain portions in view to meet the requirements of the adjoining villagers in the matter of extension of cultivation and other communal privileges. Neither the blocks concerned nor the portions to be excluded have been specified. The Collector is therefore requested to carry out the exclusions, so far as may be deemed desirable, and to resubmit the maps and notifications with the necessary alterations made so as to admit of verification in this office. He should also submit the notifications in respect of the nine blocks returned in Board's Proceedings, Forest No. 245, dated 3rd June 1896.

2. The villagewar statement prescribed in Board's Proceedings, No. 459, dated 2nd October 1896, should also be submitted so as to see how the adjoining villages are affected by the proposed reservation of the blocks in question.

3. A very early reply is requested.

To the Collector of Trichinopoly.

Copy to the Conservator of Forests, Central Circle.

READ—also the following letter from R. H. SHIPLEY, Esq., Acting Collector of Trichinopoly, to the Secretary to the Commissioners of Land Revenue (through the Conservator of Forests, Central Circle), dated 17th May 1898, Dis. No. 460-Forest:—

Adverting to Board's Reference on Forest No. 2610, dated 23rd September 1897, I have the honour to resubmit the sketches, boundary descriptions, certificate of perambulation and the area and condition statement in respect of twenty-three blocks proposed to be reserved under the Forest Act in the Musiri taluk, Trichinopoly district, which were returned with Board's Proceedings, Forest No. 245, dated 3rd June 1896, and Mis. No. 1101, dated 7th August 1896.

2. The blocks have been dealt with in detail, taking care to exclude portions, where necessary, to meet the requirements of the adjoining villagers in the matter of extension of cultivation and the exercise of communal privileges. In the case of the marginally-noted ten blocks, there are no alterations, as the areas available for communal purposes after reservation will exceed 20 per cent. of the occupied area.

3. As regards the remaining fourteen blocks, block No. 190, Thulayanatham, area 901 acres, has been rejected altogether, as the available land for extension of cultivation, &c., in the villages concerned is as follows:—

- 9 per cent. of the occupied area in Kannanur;
- 3 per cent. in Thiruthalayur;
- 5 per cent. in Perur; and
- 15 per cent. in Kodurpatti;

and alterations have been made in the remaining thirteen blocks which are described below blockwar:—

(1) *No. 185, Pulivalam.*—About 200 acres in the south of the block in Pulivalam village and 137.51 acres or all land taken up in Mambarai village have been excluded from reservation.

The villagers asked for the southern portion of the block to be left out and this has been done in preference to the northern fields referred to in paragraph 2 (1) of Board's Proceedings, Forest No. 245, dated 3rd June 1896, which have been retained in the block.

(2) *No. 186, Edumalai.*—The southernmost portion of the block in Edumalai village has been excluded as proposed in paragraph 2 (2) of the above Proceedings. In addition, on the west, portion of survey No. 8 and whole of survey No. 278 of the same village and the whole of survey No. 307 of Tenur village have also been left out of the block.

(3) *No. 189, Kottathur.*—The northern portion of the block has been excluded. It comprises portions of survey Nos. 287 and 257 of Kalathur village and survey No. 12 of Kottathur village.

(4) *No. 194, Velur block.*—A small portion has been excluded to the south of the block in Nattaramangalam and Settikolam villages. The rest of the block is hill-wide and unfit for cultivation.

(5) *No. 197, Maramareddipalaiyam.*—The boundary has been altered as amended by the Board by throwing out the southern portion of the Periyakurukkai village, south of cairn No. 19. In Senamangalam village, the south-west corner of the block has also been thrown out, as there was not enough land for extension of cultivation.

(6) *No. 201, Nedungur block.*—The eastern portion of the Padalur village taken up for the block has been excluded from reservation, so as to leave more land for extension of cultivation in the village.

(7) *No. 208, Sengattuppatti reserved forest extension.*—About one-third of the area taken up in Venkatachalapuram village for the block has been given up for communal purposes; the land is, however, unfit for cultivation.

This leaves ample margin for extension of cultivation (both permanent and temporary) referred to in Board's Proceedings, Forest Mis. No. 1101, dated 7th August 1896.

(8) *No. 191, Vellakkalpatti block.*—Half the areas taken up for this block in Valaiyur village and all the southern portion of Sirukudi village taken up for this reserve have been excluded. With reference to Board's paragraph 3—2, I have the honour to state that after reservation of this and Valaiyur block, there is a balance of assessed waste of over 60 per cent. of the occupied area still available for extension of cultivation which would appear to be sufficient.

(9) *No. 200, Sattiramanai block.*—The lands taken up for this block are all bare hills. The cultivable area in the south-west corner of the block in Siruvayalur and Sattiramanai villages has been excluded as also the north-west corner of the block in Ammapalaiyam and Kalarampatti villages, the latter partly in order to simplify the boundary.

(10) *No. 203, Appananallur block and No. 193, Mavilippatti block.*—About half the area taken up in the south of Surampatti village for the Appananallur block has been given up. This exclusion includes one of the Surampatti tanks referred to in paragraph 3 (1) of Board's Proceedings, Forest No. 245, dated 3rd June 1896. As regards the other tank included in the Mavilippatti block, it is not considered necessary to exclude it for the following reasons:—

- (1) As, if it is done, the whole area taken up in Surampatti village will have to be given up, as the boundary of the Mavilippatti block becomes too irregular to hope for any conservation;
- (2) as the growth in the tank is babul (a classified tree) which the ryots have no right to fell and use except on permits and the protection under section 16 of the Forest Act is much easier;
- (3) as provision could be made at the time of settlement for repairs to the bund whenever necessary;
- (4) as the area of unassessed waste available for the villagers for the exercise of their privileges is, without any exclusion in either block, 61 per cent. of the area now occupied; and
- (5) as the area of the block after exclusion of the Surampatti village would be less than a square mile.

(11) *No. 204, Viramuchampatti block.*—The area taken in Visalakshiammal-samudram village in the north of the block has been given up and also the portion of Ponnusangampatti village, near the south-east of the block.

As regards the Board's remark in paragraph 3 (vi) of the Board's Proceedings, Forest No. 245, dated 3rd June 1896, it is considered unnecessary to exclude the surveyed and demarcated fields lying on the east of the block (in Viramachampatti village), as the area of assessed waste still available for extension of cultivation is nearly 28 per cent. of the area now occupied in the village.

The villagers ask for the exclusion of the portion taken in Kodurpatti; it is unnecessary to exclude this portion, as all the lands taken in this village (area 372½ acres) for the Tulayanatham block have been given up (*vide* paragraph 3 *supra*).

(12) *No. 206, Sathanur block.*—The tank in Thinnanur village and the other lands to the south referred to in Board's Proceedings, No. 245, dated 3rd June 1896, paragraph 3 (iii) have been omitted from the block.

(13) *Vairisettipalaiyam block.*—Almost all the surveyed and demarcated fields in Thalugai and Vairisettipalaiyam villages have since been thrown out from the block for the use of the villagers.

4. *T. Kanappadi reserved forest extension block No. 202.*—The Tahsildar reports the area as 500 acres. The sketch which is enlarged from the taluk map only gives 172. The latter (taluk map) is on a scale of 1 inch = a mile and maps of the reserves on the Pachamalais have not been received from the Survey of India yet; so it is impossible to give the correct area.

As regards the colouring of the zamin boundary, if the back of the map is examined, it will be seen that different colours are used for the north boundary and rest. The former is the south-west corner of the T. Kanappadi reserve.

The name of the village is Thenparanadu and never having been surveyed no figures are available.

5. *Omandur block No. 207.*—With reference to paragraph 3 (iii) of Board's Proceedings, Forest No. 245, dated 3rd June 1896, the assessed waste available for extension of cultivation in Omandur and Tinnanur villages is 49½ and 128 per cent., respectively, of the occupied area and it would therefore appear quite unnecessary to exclude any of the fields in these villages which it is proposed to include in this block.

6. The areas of the blocks now given are those furnished by the Tahsildar, while the areas given when originally submitting the blocks were calculated in the District Forest office on the map by computation and less accurate than the figures now given which have been compiled from the village accounts.

7. The statement showing the ayakat, &c., of the villages included in the blocks as required in Board's Proceedings, Forest No. 459, dated 2nd October 1896, is also forwarded (will follow).

ENCLOSURE No. 4.—Sketch-maps.

Endorsement by J. W. CHERRY, Esq., Acting Conservator of Forests, Central Circle, dated 30th June 1898, No. 1951.

Forwarded.

READ—again Board's Proceedings, Forest No. 444-R., dated 16th August 1898.

ABSTRACT.—Requesting the Collector of Trichinopoly to expedite the submission of the ayakat statement in respect of the Musiri blocks, Trichinopoly district.

READ—also the following letter from R. H. SHIPLEY, Esq., Collector of Trichinopoly, to the Secretary to the Commissioners of Land Revenue, dated 2nd September 1898, R.D. No. 16-Forest:—

In continuation of my letter, Dis. No. 460-Forest, dated 17th May 1898, and with reference to Board's Proceedings, No. 444, Routine, dated 16th August 1898, I have the honour to forward, herewith, the ayakat statement prescribed in Board's Proceedings, Forest No. 459, dated 2nd October 1896, in respect of the twenty-three Musiri blocks recommended for reservation.

2. The area of Vellakkalpatti block (No. 191) was wrongly entered in the area and condition statement that accompanied my letter quoted above as 1,987.88 acres instead of as 1,857.76 acres, I request therefore that the figures 1,987.88 and 1187.88 entered against the block in columns 7 and 9 of that statement may be ordered to be corrected into 1,857.76 and 1657.76, respectively, and that the area entered in the sketch may also be rectified. The office copies of the sketch and statement have been altered accordingly.

RESOLUTION—Forest No. 503, dated 15th November 1898.

Submitted to Government with reference to Government Order, Mis. No. 3020, dated 29th July 1896, in which the Board was desired to ascertain from the Collector of Trichinopoly whether the reservation of the fifteen forest blocks in the Musiri taluk recommended in Board's Proceedings, Forest No. 245, dated 3rd June 1896, was likely to interfere with the convenience of the ryots in the neighbourhood in the matter of cultivation and grazing.

2. The Government also called for a detailed opinion from the Conservator as to whether the areas in question were likely to derive any material improvement in condition from protection under chapter II of the Forest Act and how it was proposed to manage them.

3. The letters read above contain the replies to the above reference. The Collector (Mr. B. Macleod) states that the reservation must, no doubt, cause interference with the convenience of the ryots inasmuch as they will be required to pay for grazing or prevented from enjoying even this privilege if any attempt at improvement is to be made by closure of the areas for fifteen or twenty years. He adds that, wherever necessary, portions of blocks have been excluded in accordance with the wishes of the ryots for extension of cultivation and for the exercise of communal privileges and that the extent of waste left outside the reserve generally ranges from 20 to 40 per cent. of the occupied area in each village. The Conservator (Mr. E. P. Popert) does not doubt that the areas would improve by protection and considers that they should be reserved in the interests of the ryots. He further states that the bare hills which are now used as standing ground for cattle will deteriorate if unprotected and may become useless even for that purpose. He agrees with the Collector that the hill blocks, in order to be improved, should be closed for a sufficient length of time to admit of the growth of prickly-pear and other bushes which will become a source of protection to fallen seeds and thus aid the growth of trees. In regard to the blocks in the plains, however, the Conservator considers it unnecessary to close the whole area and suggests that each block may be divided into compartments—one of which should be closed to grazing for a time, sown with tangedu (*Cassia auriculata*) and other seeds and planted with offsets at intervals so as to supply fuel and manure leaves to ryots. The Conservator's suggestions meet with the approval of the Board.

4. With these proposals, the Collector resubmits for the approval of the Board and Government the papers regarding the reservation of the nine blocks returned to the Collector in Board's Proceedings, No. 245, dated 3rd June 1896, after making the necessary revision. As a result of the further investigation with regard to all the twenty-four blocks, he now proposes to abandon one of them, No. 190, Tulaiyanattam, and recommends the reservation of the remaining twenty-three. It is observed that in the case of thirteen blocks, no alteration is proposed. (para 3)

5. When the statistics relating to the individual blocks are looked into, it appears that, owing to all unassessed land being classed as poramboke, the ayakat statements are defective, as the entry in the column showing the percentage of waste to occupied area refers to assessed waste only, and in many villages there is in addition a large area of unassessed waste available for grazing. There appears, therefore, no reason why the Board should disallow any of the proposals but in connection with blocks Nos. 186 and 189 (Edumalai and Kottathur) it might be well to make a reduction during settlement in the area of assessed waste which it is proposed to take up in the villages of Tenur and Kalathur. A similar reduction might be found practicable with regard to the villages of Sedevimangalam in block No. 188 (Maniyankurichi), Mangalam and Mavilapatti in block No. 193 (Mavilappatti), Senamangalam in block No. 197 (Marmareddipalaiyam), Sobanapuram in blocks Nos. 198 and 208 (Valkaradu and Sengattupatti extension), Neikulam in block No. 201 (Nedungur) and Viramachampatti and Ponnusagarampatti in block No. 204 (Viramachampatti).

Again in the villages of Mavilapatti in block No. 193 (Mavilapatti), in Velur and Sathiramanai in blocks Nos. 194 and 200 (Velur and Sathiramanai), and in Nakkesalam in block No. 195 (Nakkesalem), the proportion of poramboke or unassessed waste which it is proposed to bring under reservation seems unduly large, as the area of assessed waste left unreserved is small and much of it will soon be brought under

the plough. The advisability of excluding a portion of unassessed waste in these villages should therefore be considered at settlement.

6. The following discrepancies are noticed in the records; the necessary corrections have been made in the Board's office.

Block No. 185, Pulivalam ...	...	Survey Nos. 95 and 141 of Pulivalam shown in the list appended to the draft notification as partly lying within the reserve have not been indicated on the map.	
" " 186, Edumalai ...	...	Survey Nos. 230 and 231 of Edumalai are mentioned in the draft notification as lying within the reserve, while the sketch-map shows them to be outside.	
" " 188, Maniyankurichi ...	...	Survey No. 365 of Sedevimangalam is recorded in the draft notification as wholly included within the reserve, while from the map, only a portion appears to be inside. Similarly survey No. 258 of the same village shown therein as partly lying within the reserve appears from the map to be situated wholly outside it.	- 80 -
" " 189, Kottathur ...	...	Survey No. 303-2 of Kalathur has been omitted from the list of fields comprised within the reserve.	- 80 -
" " 192, Vairisettipalaiyam Talugai.	...	A portion only and not the whole of survey No. 136 of Koppampatti is included within the reserve.	- 80 -
" " 194, Velur ...	...	Survey No. 2 of Settikulam has been omitted from the list of fields comprised within the reserve.	- 80 -
" " 195, Nakkasalem ...	...	A portion only of survey No. 1 of Nakkasalem village and not the whole of it as shown in the draft notification is included within the reserve.	- 80 -
" " 197, Marmareddipalaiyam ...	...	Survey No. 330 of Senamangalam which, according to the sketch-map, lies within the reserve has been omitted from the draft notification; survey No. 526 of the same village shown in the draft notification as lying within the reserve appears from the sketch-map to lie outside it, and survey No. 331 shown therein as only partly included is wholly inside the reserve.	- 80 -
" " 204, Viramachampatti ...	...	A portion of survey No. 135 of Viramachampatti is shown in the draft notification as included within the reserve, while, according to the sketch-map, the whole field lies outside it.	- 80 -
" " 205, Pagalavadi ...	...	Survey No. 488 of Tinnanur and No. 29 of Pagalavadi Puduperumalpalaiyam villages are indicated as survey Nos. 483 and 23, respectively, in the map.	- 80 -
" " 206, Sathanur ...	...	Survey No. 631 of Tinnanur lying within the reserve limits does not find place in the draft notification and survey No. 489 partly inside the reserve is shown therein as wholly within it.	- 80 -
" " 207, Omandur ...	...	Survey No. 372 of Omandur lying within the reserve has been omitted from the draft notification.	- 80 -

To the Under Secretary.

With reference to para 2

of B. P. (Forest) No. 617 of 5.10.94

requesting the Collectors of Certain districts to expedite proposals for

further reservation, the Collector of

Trichinopoly forwarded with his

letter of 6.2.96, notifications under

section relating to twenty-four blocks

in the Mausiri taluk, stating at the

same time that these proposals

proposals but forwarded to the

Government for publication only

fifteen out of the twenty four

notifications, retaining the remain-

ing notifications to the Collector for

revision and resubmission.

2 The Board's proposals did

not however meet with the full

approval of the Government, as the

fifteen blocks (for which notifications

were forwarded) were not promising

forests and as their reservation was

(i) whether the proposed reservation would not cause inconvenience to the ryots

(ii) how it was proposed to manage the areas and whether they were likely to derive any material improvement in condition from protection under Chapter II of the Forest Act.

The Board's reply to this reference is contained in its Proceedings now received.

The Collector states that the reservation proposed will no doubt cause inconvenience but only to the ryots in the same manner, he adds, as the convenience of the ryots is interfered with wherever forests are reserved.

He also states that in every case land ~~transferred~~ ranging from 20 to 40 per cent of the area have been left outside the blocks for the use of the villagers.

With reference to point (ii) above, the Conservator states that there is no doubt that the areas would derive material improvement from protection and that

it is to the interests of the ryots that they should be reserved. As regards the method of Conservancy, the Conservator states that the hill blocks must be closed ^{at all events} for some time and that the plain blocks should be divided into compartments, only one compartment at a time ^{being} taken on hand and closed to grazing. ~~for some time~~ These proposals meet with the approval of the Board.

3. Of the fifteen blocks the notifications for which were returned to the Board as mentioned above, the ~~Collector~~ and the Board of Revenue now

propose the reservation of only fourteen the reservation of the Thulayanathan block being disallowed on the ground that the land available for the village

is ~~will otherwise~~ be very small (from 3 to 15 per cent of the occupied areas in the villages concerned).

Besides these fourteen blocks, the Board of Revenue also proposes the reservation of the nine blocks, proposals in respect of which were returned to the Collector with the remarks in para 3 of

B.P. (Forest) No. 245 of 3.6.96. The reasons for the reservation of these

line blocks and the method proposed for $\frac{1}{2}$ Concerning them are presumably of the same as those for the other fourteen blocks.

4 Besides the exclusion of portions of blocks made by the Collector, wherever necessary, to meet the requirements of the villagers, the Board of Revenue has also suggested further exclusion of portions of certain blocks, ^{to be} made during Settlement. (para 2 of Collector's letter of 17.5.98 printed on page 4 of the B.P. (Current).)

5 From the statement below it will be seen that if the Board's proposals are approved, the percentage of forests in the Musiri taluk ~~to be~~ will be 19.09 per cent of the area of Government lands and 45.30 per cent of the area of $\frac{1}{2}$ unoccupied lands

Reserved Forests.

Approving the Board's proposals in regard to the constitution of twenty-three blocks, in the Musiri taluk, Trichinopoly district, as —, and ordering the publication of the notification under section 4 of the Madras Forest Act in the Fort St. George and Trichinopoly District Gazettes.

GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

Read—the following Proceedings of the Board of Revenue (Land Revenue), Forest No. 503, dated 15th November 1898:—

Read—again Proceedings of the Board of Revenue (Land Revenue), Forest Mis. No. 1101, dated 7th August 1896.

ABSTRACT.—Communicating to the Collector of Trichinopoly and the Conservator of Forests, Central Circle, Government Order calling upon the Board to report whether the reservation of the fifteen blocks in the Musiri taluk, Trichinopoly district, proposed to be constituted reserved forests under section 4 of the Forest Act, will not cause inconvenience to the ryots and whether the blocks are likely to be materially improved by such reservation.

Read—also the following letter from BANNATYNE MACLEOD, Esq., M.A. (Barrister-at-Law), Acting Collector of Trichinopoly, to the Secretary to the Commissioners of Land Revenue (through the Conservator of Forests, Central Circle), dated 25th August 1897, R. C. No. 276-For.:—

With reference to Board's Proceedings, Forest Mis. No. 1101, dated 7th August 1896, communicating a Government Order calling for report as to whether the reservation of fifteen blocks in the Musiri taluk would interfere with the convenience of the ryots, and also how it is proposed to manage the blocks, and whether protection would improve them, I have the honour to inform you that if the hill blocks are to be improved, they must be kept closed for fifteen or twenty years. At present it is no use attempting to sow or plant these blocks; the original forest has been destroyed and the soil washed away. If the forest is closed, prickly-pear and bushes will spring up and in time afford shelter to the seeds of trees, besides assisting in disintegrating the rocks. The blocks on the plains are all more or less bare; to improve them they must also be closed. As a commercial undertaking, it would probably pay to plough them up and sow avaram (*Cassia auriculata*); there is an increasing demand for this shrub and it is becoming very scarce, especially in Musiri taluk, where fuel is so scarce that it is reported that the people are digging up the roots of avaram and other shrubs. This shrub would also provide shelter for the young trees which would spring up in time. If, therefore, these forests are to be reserved, it is quite clear that the convenience of the people must be interfered with, as, even if no attempt is made at improvement, grazing fees will be charged. This condition must obtain everywhere, where forests are reserved, and is not peculiar to the Musiri blocks alone.

2. Further, in the case of these fifteen blocks as well as the nine blocks, the boundary descriptions, &c., of which were returned by the Board of Revenue with its Proceedings, Forest No. 245, dated 3rd June 1896, the Tahsildar of Musiri and Divisional-officer were requested to make local enquiries after personal inspection of the blocks with the ryots concerned and to find out whether the proposed reservation of the blocks will cause hardship to them by unduly restricting the areas available for extension of cultivation and grazing. The Tahsildar has submitted his report on only seventeen of these blocks and recommends the blocks being reserved for forest purposes after

excluding some portions of certain blocks, as the ryots wish the same for extension of cultivation and for the exercise of communal privileges. In every case the percentage of land left outside the reserve will now amount to 20 per cent. of the occupied area in each village; in some cases it is as much as 40 per cent. In some cases, the ryots have raised no objection whatever to the proposed reservations. As regards the remaining seven blocks, the Tahsildar and Divisional-officer have been reminded to send in their reports, and proposals for reservation will be submitted as soon as these are received.

Endorsement by E. P. POPERT, Esq., Conservator of Forests, Central Circle, dated Camp, Melput, 29th August 1897, No. 447.

Forwarded.

2. There is not the slightest doubt the areas would derive material improvement from protection and it is to the interest of the ryots in the neighbourhood that they should be reserved.

3. At present the bare hills are valueless to everybody, except as standing ground for cattle; unless protected, they will further deteriorate and become useless for even that purpose. If improvement is to be effected, the areas must be closed at all events for some time. The first step as pointed out by the Collector towards their improvement will be the appearance of Euphorbia, prickly-pear, &c. To attempt now to plant up these areas would be waste of money. Their reservation cannot be looked upon as a profitable commercial speculation, they will not be a source of revenue to the Forest Department; the cost of settlement, demarcation, &c., will not be recouped for very many years to come.

4. The case of the blocks in the plains is different. There is no necessity to close the whole area. Each should be divided into compartments and only one compartment at a time should be taken on hand. This must be closed to grazing for a time. Strops should be ploughed up and seed of *Acacia leucophloea* and *Cassia auriculata*, &c., be sown in the furrows. In addition offsets, sufficiently long to be out of the reach of cattle, might be put out, these, besides affording a certain amount of shade, would, in a few years, yield leaves for manure, a commodity badly wanted in the taluk.

Reference on the above, dated 23rd September 1897.

The maps and other enclosures returned with Board's Proceedings, Forest Mis. No. 1101, dated 7th August 1896, have not been resubmitted by the Collector with the letter read above. It is also observed from paragraph 2 of the Collector's letter that the Tahsildar of Musiri recommends in the case of certain blocks the exclusion of certain portions in view to meet the requirements of the adjoining villagers in the matter of extension of cultivation and other communal privileges. Neither the blocks concerned nor the portions to be excluded have been specified. The Collector is therefore requested to carry out the exclusions, so far as may be deemed desirable, and to resubmit the maps and notifications with the necessary alterations made so as to admit of verification in this office. He should also submit the notifications in respect of the nine blocks returned in Board's Proceedings, Forest No. 245, dated 3rd June 1896.

2. The villagewar statement prescribed in Board's Proceedings, No. 459, dated 2nd October 1896, should also be submitted so as to see how the adjoining villages are affected by the proposed reservation of the blocks in question.

3. A very early reply is requested.

(Signed) R. C. C. CARR,
Secretary.

To the Collector of Trichinopoly.

Copy to the Conservator of Forests, Central Circle.

Read—also the following letter from R. H. SHIPLEY, Esq., Acting Collector of Trichinopoly, to the Secretary to the Commissioners of Land Revenue (through the Conservator of Forests, Central Circle), dated 17th May 1898, Dis. No. 460-Forest:—

Adverting to Board's Reference on Forest No. 2610, dated 23rd September 1897, I have the honour to resubmit the sketches, boundary descriptions, certificate of perambulation and the area and condition statement in respect of twenty-three blocks proposed to be reserved under the Forest Act in the Musiri taluk, Trichinopoly district, which were returned with Board's Proceedings, Forest No. 245, dated 3rd June 1896, and Mis. No. 1101, dated 7th August 1896.

2. The blocks have been dealt with in detail, taking care to exclude portions where necessary, to meet the requirements of the adjoining villagers in the matter of extension of cultivation and the exercise of communal privileges. In the case of the marginally-noted ten blocks, there are no alterations, as the areas available for communal purposes after reservation will exceed 20 per cent. of the occupied area.

3. As regards the remaining fourteen blocks, block No. 190, Thulayanatham, area 901 acres, has been rejected altogether, as the available land for extension of cultivation, &c., in the villages concerned is as follows:—

- 9 per cent. of the occupied area in Kannanur;
- 3 per cent. in Thiruthalayur;
- 5 per cent. in Perur; and
- 15 per cent. in Kodurpatti;

and alterations have been made in the remaining thirteen blocks which are described below blockwar:—

(1) *No. 185, Pulivalam.*—About 200 acres in the south of the block in Pulivalam village and 137.51 acres or all land taken up in Mambarai village have been excluded from reservation.

The villagers asked for the southern portion of the block to be left out and this has been done in preference to the northern fields referred to in paragraph 2 (1) of Board's Proceedings, Forest No. 245, dated 3rd June 1896, which have been retained in the block.

(2) *No. 186, Edumalai.*—The southernmost portion of the block in Edumalai village has been excluded as proposed in paragraph 2 (2) of the above Proceedings. In addition, on the west, portion of survey No. 8 and whole of survey No. 278 of the same village and the whole of survey No. 307 of Tenur village have also been left out of the block.

(3) *No. 189, Kottathur.*—The northern portion of the block has been excluded. It comprises portions of survey Nos. 287 and 257 of Kalathur village and survey No. 12 of Kottathur village.

(4) *No. 194, Velur block.*—A small portion has been excluded to the south of the block in Nattaramangalam and Settikolam villages. The rest of the block is hill-side and unfit for cultivation.

(5) *No. 197, Maramareddipalaiyam.*—The boundary has been altered as amended by the Board by throwing out the southern portion of the Periyakurukkai village, south of cairn No. 19. In Senamangalam village, the south-west corner of the block has also been thrown out, as there was not enough land for extension of cultivation.

(6) *No. 201, Nedungur block.*—The eastern portion of the Padalur village taken up for the block has been excluded from reservation, so as to leave more land for extension of cultivation in that village.

(7) *No. 208, Sengattuppatti reserved forest extension.*—About one-third of the area taken up in Venkatachalapuram village for the block has been given up for communal purposes; the land is, however, unfit for cultivation.

This leaves ample margin for extension of cultivation (both permanent and temporary) referred to in Board's Proceedings, Forest Mis. No. 1101, dated 7th August 1896.

(8) *No. 191, Vellakkalpatti block.*—Half the areas taken up for this block in Valaiyur village and all the southern portion of Sirukudi village taken up for this reserve have been excluded. With reference to Board's paragraph 3—2, I have the honour to state that after reservation of this and Valaiyur block, there is a balance of assessed waste of over 60 per cent. of the occupied area still available for extension of cultivation which would appear to be sufficient.

(9) *No. 200, Sattiramanai block.*—The lands taken up for this block are all bare hills. The cultivable area in the south-west corner of the block in Siruvayalur and Sattiramanai villages has been excluded as also the north-west corner of the block in Ammapalaiyam and Kalarampatti villages, the latter partly in order to simplify the boundary.

(10) *No. 203, Appananallur block and No. 193, Mavilippatti block.*—About half the area taken up in the south of Surampatti village for the Appananallur block has been given up. This exclusion includes one of the Surampatti tanks referred to in paragraph 3 (1) of Board's Proceedings, Forest No. 245, dated 3rd June 1896. As regards the other tank included in the Mavilippatti block, it is not considered necessary to exclude it for the following reasons:—

(1) As, if it is done, the whole area taken up in Surampatti village will have to be given up, as the boundary of the Mavilippatti block becomes too irregular to hope for any conservation;

(2) as the growth in the tank is babul (a classified tree) which the ryots have no right to fell and use except on permits and the protection under section 16 of the Forest Act is much easier;

(3) as provision could be made at the time of settlement for repairs to the bund whenever necessary;

(4) as the area of unassessed waste available for the villagers for the exercise of their privileges is, without any exclusion in either block, 61 per cent. of the area now occupied; and

(5) as the area of the block after exclusion of the Surampatti village would be less than a square mile.

(11) *No. 204, Viramachampatti block.*—The area taken in Visalakshiammal-samudram village in the north of the block has been given up and also the portion of Ponnusangampatti village, near the south-east of the block.

As regards the Board's remark in paragraph 3 (vi) of the Board's Proceedings, Forest No. 245, dated 3rd June 1896, it is considered unnecessary to exclude the surveyed and demarcated fields lying on the east of the block (in Viramachampatti village), as the area of assessed waste still available for extension of cultivation is nearly 28 per cent. of the area now occupied in the village.

The villagers ask for the exclusion of the portion taken in Kodurpatti; it is unnecessary to exclude this portion, as all the lands taken in this village (area 372½ acres) for the Tulayanatham block have been given up (*vide* paragraph 3 *supra*).

(12) *No. 206, Sathanur block.*—The tank in Thinnanur village and the other lands to the south referred to in Board's Proceedings, No. 245, dated 3rd June 1896, paragraph 3 (iii) have been omitted from the block.

(13) *Vairisettipalaiyam block.*—Almost all the surveyed and demarcated fields in Thalugai and Vairisettipalaiyam villages have since been thrown out from the block for the use of the villagers.

4. *T. Kanappadi reserved forest extension block No. 202.*—The Tahsildar reports the area as 500 acres. The sketch which is enlarged from the taluk map only gives 172. The latter (taluk map) is on a scale of 1 inch = a mile and maps of the reserves on the Pachamalais have not been received from the Survey of India yet; so it is impossible to give the correct area.

As regards the colouring of the zamin boundary, if the back of the map is examined, it will be seen that different colours are used for the north boundary and rest. The former is the south-west corner of the T. Kanappadi reserve.

The name of the village is Thenparanadu and never having been surveyed no figures are available.

5. *Omandur block No. 207.*—With reference to paragraph 3 (iii) of Board's Proceedings, Forest No. 245, dated 3rd June 1896, the assessed waste available for extension of cultivation in Omandur and Tinnanur villages is 49½ and 128 per cent., respectively, of the occupied area and it would therefore appear quite unnecessary to exclude any of the fields in these villages which it is proposed to include in this block.

6. The areas of the blocks now given are those furnished by the Tahsildar, while the areas given when originally submitting the blocks were calculated in the District Forest office on the map by computation and less accurate than the figures now given which have been compiled from the village accounts.

7. The statement showing the ayakat, &c., of the villages included in the blocks as required in Board's Proceedings, Forest No. 459, dated 2nd October 1896, is also forwarded (will follow).

ENCLOSURE No. 4.—Sketch-maps.

Endorsement by J. W. CHERRY, Esq., Acting Conservator of Forests, Central Circle, dated 30th June 1898, No. 1951.

Forwarded.

Read—again Board's Proceedings, Forest No. 444-R., dated 16th August 1898.

ABSTRACT.—Requesting the Collector of Trichinopoly to expedite the submission of the ayakat statement in respect of the Musiri blocks, Trichinopoly district.

Read—also the following letter from R. H. SHIPLEY, Esq., Collector of Trichinopoly, to the Secretary to the Commissioners of Land Revenue, dated 2nd September 1898, R.D. No. 16-Forest:—

In continuation of my letter, Dis. No. 460-Forest, dated 17th May 1898, and with reference to Board's Proceedings, No. 444, Routine, dated 16th August 1898, I have the honour to forward, herewith, the ayakat statement prescribed in Board's Proceedings, Forest No. 459, dated 2nd October 1896, in respect of the twenty-three Musiri blocks recommended for reservation.

2. The area of Vellakkalpatti block (No. 191) was wrongly entered in the area and condition statement that accompanied my letter quoted above as 1,987-88 acres instead of as 1,857-76 acres, I request therefore that the figures 1,987-88 and 1187-88 entered against the block in columns 7 and 9 of that statement may be ordered to be corrected into 1,857-76 and 1057-76, respectively, and that the area entered in the sketch may also be rectified. The office copies of the sketch and statement have been altered accordingly.

Resolution—Forest No. 503, dated 15th November 1898.

Submitted to Government with reference to Government Order, Mis. No. 3020, dated 29th July 1896, in which the Board was desired to ascertain from the Collector of Trichinopoly whether the reservation of the fifteen forest blocks in the Musiri taluk recommended in Board's Proceedings, Forest No. 245, dated 3rd June 1896, was likely to interfere with the convenience of the ryots in the neighbourhood in the matter of cultivation and grazing.

2. The Government also called for a detailed opinion from the Conservator as to whether the areas in question were likely to derive any material improvement in condition from protection under chapter II of the Forest Act and how it was proposed to manage them.

3. The letters read above contain the replies to the above reference. The Collector (Mr. B. Macleod) states that the reservation must, no doubt, cause interference with the convenience of the ryots inasmuch as they will be required to pay for grazing or prevented from enjoying even this privilege if any attempt at improvement is to be made by closure of the areas for fifteen or twenty years. He adds that, wherever necessary, portions of blocks have been excluded in accordance with the wishes of the ryots for extension of cultivation and for the exercise of communal privileges and that the extent of waste left outside the reserve generally ranges from 20 to 40 per cent. of the occupied area in each village. The Conservator (Mr. E. P. Popert) does not doubt that the areas would improve by protection and considers that they should be reserved in the interests of the ryots. He further states that the bare hills which are now used as standing ground for cattle will deteriorate if unprotected and may become useless even for that purpose. He agrees with the Collector that the hill blocks, in order to be improved, should be closed for a sufficient length of time to admit of the growth of prickly-pear and other bushes which will become a source of protection to fallen seeds and thus aid the growth of trees. In regard to the blocks in the plains, however, the Conservator considers it unnecessary to close the whole area and suggests that each block may be divided into compartments—one of which should be closed to grazing for a time, sown with tangedu (*Cassia auriculata*) and other seeds and planted with offsets at intervals so as to supply fuel and manure leaves to ryots. The Conservator's suggestions meet with the approval of the Board.

4. With these proposals, the Collector resubmits for the approval of the Board and Government the papers regarding the reservation of the nine blocks returned to the Collector in Board's Proceedings, No. 245, dated 3rd June 1896, after making the necessary revision. As a result of the further investigation with regard to all the twenty-four blocks, he now proposes to abandon one of them, No. 190, Tulaiyanattam, and recommends the reservation of the remaining twenty-three. It is observed that in the case of thirteen blocks, no alteration is proposed.

5. When the statistics relating to the individual blocks are looked into, it appears that, owing to all unassessed land being classed as poramboke, the ayakat statements are defective, as the entry in the column showing the percentage of waste to occupied area refers to assessed waste only, and in many villages there is in addition a large area of unassessed waste available for grazing. There appears, therefore, no reason why the Board should disallow any of the proposals but in connection with blocks Nos. 186 and 189 (Edumalai and Kottathur) it might be well to make a reduction during settlement in the area of assessed waste which it is proposed to take up in the villages of Tenur and Kalathur. A similar reduction might be found practicable with regard to the villages of Sedevimangalam in block No. 188 (Maniyankurichi), Mangalam and Mavilapatti in block No. 193 (Mavilappatti), Senamangalam in block No. 197 (Marmareddipalaiyam), Sobanapuram in blocks Nos. 198 and 208 (Valkaradu and Sengattupatti extension), Neikulam in block No. 201 (Nedungur) and Viramachampatti and Ponnusagarampatti in block No. 204 (Viramachampatti).

Again in the villages of Mavilapatti in block No. 193 (Mavilapatti), in Velur and Sathiramanai in blocks Nos. 194 and 200 (Velur and Sathiramanai), and in Nakkesalam in block No. 195 (Nakkesalem), the proportion of poramboke or unassessed waste which it is proposed to bring under reservation seems unduly large, as the area of assessed waste left unreserved is small and much of it will soon be brought under the plough. The advisability of excluding a portion of unassessed waste in these villages should therefore be considered at settlement.

6. The following discrepancies are noticed in the records; the necessary corrections have been made in the Board's office.

Block No. 185, Pulivalam	...	...	Survey Nos. 95 and 141 of Pulivalam shown in the list appended to the draft notification as partly lying within the reserve have not been indicated on the map.
" " 186, Édumalai	...	...	Survey Nos. 230 and 231 of Édumalai are mentioned in the draft notification as lying within the reserve, while the sketch-map shows them to be outside.
" " 188, Maniyankurichi	...	...	Survey No. 365 of Sedevimangalam is recorded in the draft notification as wholly included within the reserve, while from the map, only a portion appears to be inside. Similarly survey No. 258 of the same village shown therein as partly lying within the reserve appears from the map to be situated wholly outside it.
" " 189, Kottathur	...	...	Survey No. 303-2 of Kalathur has been omitted from the list of fields comprised within the reserve.
" " 192, Vairisettipalaiyam Talugai.	...	...	A portion only and not the whole of survey No. 136 of Koppampatti is included within the reserve.
" " 194, Velur	...	...	Survey No. 2 of Settikulam has been omitted from the list of fields comprised within the reserve.
" " 195, Nakkasalem	...	...	A portion only of survey No. 1 of Nakkasalem village and not the whole of it as shown in the draft notification is included within the reserve.
" " 197, Marmareddipalaiyam	...	...	Survey No. 330 of Senamangalam which, according to the sketch-map, lies within the reserve has been omitted from the draft notification; survey No. 526 of the same village shown in the draft notification as lying within the reserve appears from the sketch-map to lie outside it, and survey No. 331 shown therein as only partly included is wholly inside the reserve.
" " 204, Viramachampatti	...	...	A portion of survey No. 135 of Viramachampatti is shown in the draft notification as included within the reserve, while, according to the sketch-map, the whole field lies outside it.
" " 205, Pagalavadi	...	...	Survey No. 488 of Tinnanur and No. 29 of Pagalavadi Puduperumalpalaiyam villages are indicated as survey Nos. 483 and 23, respectively, in the map.

Block No. 206, Sathanur	...	...	Survey No. 631 of Tinnanur lying within the reserve limits does not find place in the draft notification and survey No. 489 partly inside the reserve is shown therein as wholly within it.
" " 207, Omandur	...	...	Survey No. 372 of Omandur lying within the reserve has been omitted from the draft notification.
