Proceedings of the Board of Revenue (Land Revenue).

Forest No 675 his, dated 5 October 1898.

Read Government Order, Revenue Department No 486, dated 29 August 1898.

Resolution

Recorded with the remark that the difference of 140 sq. miles noted in item 3 of the G.O. read above, was due to special reasons, viz. —

- (1) The area of the Rekapalli Hills reserved in the Godavari District which was notified under Sec. 16 during 1895-96 and the reservation of which did not take effect during that year was recorded as 168 square miles in col. 9 of appendix A to the Board's Administration Report for that year, whereas the actual area of the reserved deducting the exclusions at settlement was only 146 sq. miles. The former area was erroneously returned by the Collector in the Annual statements for 1895-96 and the correct figure viz. 146 was given in the statements

statements for 1896-97. There is thus a difference of 22 square miles.

(2) ^{Eight} 8 reserves covering an extent of 11 square miles in the South Canara District were notified during 1895-96 but their reservation did not take effect either in 1895-96 or in 1896-97. This extent was included in both the figures 311 & 122 given in the statement printed at page 6 of the Report for 1896-97 and the fact was noted in the foot-note to the statement. These eleven square miles appear to have been counted twice over in the calculation made in the Government Office.

(3) ^{Two} 2 reserves in the Nellore District, namely, Eldayajiri Veligondra and Abbasakhepeta-Gudipad. Peddamalur, covering an area of 96 square miles, which were notified under Sec. 16 during the year 1895-96, but the reservation of which took effect only during 1896-97 were omitted from Form 45 of the report for 1895-96 and were therefore entered in the form for 96-97.

(4) For the same reason as the above, 2 reserves of 10 sq. miles in the North Arcot District, viz (Chanco hill and Sycamagunta extension) which were omitted from Form No. 45 of the report for 1895-96 were entered in the return for 1896-97.

(5) The balance of 1.8 square miles was due to

to rounding off of fractions.
