Proceedings of the Board of Revenue
Land Revenue
Ct. 2814 Miss, dated 10th October 1898

Read Government Order, Revenue Department, dated 22nd September 1898. Ct. 548: D

Resolution. The Government Order read above will be communicated to the Collector of Salem, the Conservator of Forests, Central Circle, Messrs. Best and Company and Messrs. H. G. Turner and Macfadyen.

2. Major Matton, Superintendent, Foundry and Shell Factory Cassipore, who has taken so much interest in the matter will be requested to favour the Board with any remarks he may wish to offer on the results recorded in the papers printed in the G.O. read above.

3. After Mr. Middlemiss report that the specimens selected by him did not average more than 40 percent of metallic iron, condemnation was a foregone conclusion so far as those specimens were concerned but one of the recent applicants for a (prospecting) license for Kanjamalai has remarked that magnetite beds notoriously vary both in grade and to quality, and it is possible that a different verdict might have been obtained as regards the ore if the specimens had been selected by a mining expert. The fact remains that much better analyses were obtained from other specimens and plenty of good ore was obtained by the old East India Iron Company. (See Exhibit)
