(Revenue Settlement, Land Records and Agriculture).

Dated 23rd February 1899.

No. 1089 Miscellaneous

READ The following letter from J. G. D Partridge Esq.
Ag. Collector of Maowra, Dis No 283 of 99
dated 8th February 1899:-
Rev^d

Adverting to para 2 of Board's Proceed
No 3755-ings, No 316 dated 29th August 1898, enquiring
16-9-98 whether pony-breeding operations can be
resumed in this District with a reasonable
prospect of success, I have the honor to
state that the only Taluks in this District
where the experiment can, if at all, be
tried with any chance of success are
Dindigul and Palni. The Tahsildar of
Palni, however, reported that most of
the owners of Mares in his Taluk were
unwilling to send them to Palni to be
covered. The Tahsildar of Dindigul stated
that, considering the fact that pony breeding
operations were once tried in his Taluk,
but proved a failure, it was doubtful
whether

whether they would now be successful if resumed. It seems unlikely that the trial would prove successful. But the Superintendent, Civil Veterinary Department, who was consulted on the point, says that, when he visited Palni in October last, he inspected some dozen mares, some of which were in hard working condition and some were fat and that they were quite the best looking of any ponies he saw on that tour. For these reasons he thinks that the experiment should be tried in Palni with a stallion about 13.2 in height (a copy of his letter is enclosed). As the Superintendent, Civil Veterinary Department, seems to have personally seen the animals in Palni Taluk and to be sure of success, I recommend that his proposal to send a stallion before the end of March may be approved.

Resolution

The Superintendent, Civil Veterinary Department, is requested to arrange to send a stallion not more than 13.2 hands in height to Palni as a tentative measure

2. The Collector of Madurai will also be requested to issue instruction to the Tahsildar of Palni Taluk to make proper arrangements for giving work to the stallion.
