

Handwritten notes and tables, likely a ledger or record book, containing various entries, dates, and numerical data. The text is written in a cursive script, possibly a South Asian language, and includes several tables with columns of numbers and text. The entries are organized into sections, some with headings like "Vijayan Village" and "Canyawaram Sany". The tables contain numerical data, possibly representing measurements or financial records, and are often accompanied by descriptive text. The handwriting is dense and somewhat difficult to read in places due to the cursive style and overlapping entries.
