For the personal benefit of the holder — Inclt 120-0-0 — Granted for 3 lives — granted on 25th July 1820 by the British Govt as stated in the Collectr register of F 1224. The grant comprises this and the 3 villages of Ollikaralam, Kolambak. and Palayanur.

Transfer from Mandals — Not Entered in Taraballa account in the year 1774, Est 120-0-0 — In Tsal accounts of F 1210 Est 120-0-0 — In Register accounts of Fasly 1224

Collectr register of 1821 Sadasiva alias Kumara Swami Mudaliar adoption

Vellinaikammal aged 33

Heir adopted

The adoption of the party in col 15 was approved and he died four years ago leaving a childless widow Vellinayakamma and another relation Sundara = murth Mandali to whom the deceased executed a will appointing him as his heir and enjoining him to pay to his the testators widow a monthly allowance of Rs 10-0-0

The widow applied to the Board for the registry of the village in her name who confirmed the will of her husband and upon appeal to Government she was referred to the Civil Court.

In the Principal Sadar Ammi Court, the validity of the will was set aside the village and others forming the grant with the other property of the deceased were decreed to the testators widow, the civil judge confirmed the decision of the lower Court and the issue of the High Court in Special appeal is not yet known.

This being a life Shaper village, either of the life grants whoever may be successful — to be sent

Confirmed to the widow in Col 15 See remarks in Reg.r No 38 of Pooliancoil Tsalook

WK

2/2/48

as rightful ~~owner~~ heir by the High Court found the 3 life on the expiration of which the villages comprising the grant will revert to Govt. according to the terms of the grant

This village could not be enfranchised against the order of Govt. No. of 15th October 1861 and I bring it upon the register for future consideration mentioning the rate applicable to turn it into a fee hold.

By the time the sanction of Govt. is obtained for enfranchisement the High courts decision will settle the rightful successor.

The Amarfee right for the villages forming the grant belongs to the Raiyats and the Shotriamdars have right only for the Melwaram ~~have right only for the Melwaram~~ or rent share transferred to the grantee in col 13 for his distinguished services in the accountant generals office.

This village has been for some years back in good circumstances, cultivation has already reached its highest standard & the irrigation has been in a most improved state. The whole of the Ayakat has been cultivated and so portion of the available Paramboke has been included in the proposed assessment that there is very little probability of cultivation receiving further extension. The present assessment of Rs 3554 is far in excess of what it would pitch by Government of brought under the Paravari settlement, because the average assessment in this village is Rs 4-6-11 while the average assessment of the surrounding Govt villages is Rs 2-3-2 per acre.

The Pumpsets in this village is of a very superior description & is well worth the labour of cultivation & of course cultivation has been carried to an extent of 85-16 acres that is eight times the average cultivation has been admitted as available wet & though the Ryots & the Sirkumdars were very much against

This village does not require any remarks at all except that it has got insufficient irrigation & having no separate tank of its own and depending on the Kanmoi Tank of Kandur village.

This village has got no means of irrigation & is wholly dependent on rain & is not at all inhabited. The little cultivation that has been made has been raised principally by wells dug by the Ryots & the low state of the produce shows the inferiority of soil; the only way to induce the Ryots to take to would be to assess this village at the lowest rate of Punja; & even then there is very little probability of the whole Ayakat being ever cultivated as it is being inundated by the tank water of Attimari village; so that after a deduction of Kani &c the remainder has been included in the class of cultivable unassessed at Rs 2 and Rs 1-8-2 per acre, the average of the surrounding villages. In the reduction of the Karaikari or the raised Punja to the Punja class is under contemplation & the reduction of Punja assessment in Government villages is shortly to be effected, this proposed arrangement appears to the Judicious.

The expected profit of the Sirkumdar in this being Rs 1333. after deducting the expenses. The half permanent assessment on these villages would be Rs 2666 according to the rules of the Commission. Considering that no allowance has been made for contingencies, the permanent assessment would; it would appear, be rather disadvantageous to Government. This necessity of reducing these villages under the fasli bound becomes apparent when we take into consideration the long time that the present Sirkumdar has got these villages now being about 55 years old.
