There was a 22 Team of one Hapoy of most land in the Village - The first 28th 1894 measuring 1-2-12 as per survey which was fully a farmed into the survey - during which time the whole of the Team was erroneously charged as 22 Teams in lieu of the 24 Gajaman Teams - This is what I gather from the Enquiry & the evidence of all the Villagers assembled & of the Farmers according to the request of the Village clearafenders who are the parties in Col. 16. I treat the Team as 22 Gajaman Teams - Altho' part of the Book entry is lost got from other accounts with the Carrier. I feel satisfied that this Team is the 24 Gajaman Team survey stated by the
