

1057
1058-

After these two enlarges
appears as one in the
old Lee where he was
and accounts, I am
now & then till Dec. 8. 6.

The combined average P_g.

much area after the two exchanges over
the one game in the Lake of Geneva
in the case of small the

with nothing seen, but a

Plants of crops have ^{never or al} ~~not~~ been seen in the surrounding country. It is
 stated that ~~the~~ the cause of some

present ~~and~~ tell me about the difference

old and present areas is due to a difference in the length of the
Paganis's ^{acorns} collected at different times.

My recommendation is

spec. of 2 separate little beads is necessary as I have thought
the two exchanges of Kuthupallam and Khantiga are separate & from
each other. They are large round & flat, are at a distance of 2 miles being a
little raised for the purpose of exchange of sugar.

The content in vol 8 of the Kutherap.
is common to the copies and contains
nothing as the page is in front of the
the number being 107-114

the extent of each of the singular
 groups of the whole

Louis writing to Mr. S. I have received the
 letter and am glad to hear of the continued
 health of the nonpareils. With kindest regards from the
 collection office to the collection of the office. I am very respectfully

From the copy preserved & by Sir Thomas. There is account does not show the
the villages as houses or farm-houses; but the Massachussetts Collection register of 1841 shows
the village of 10 years or more than 100 years ago. It is a village of 10 years or more than 100 years ago.
