There is only 1 channel of 2 [illegible] barely sufficient for irrigation. The wet lands are subject to the [illegible] of the adjoining large tank of Agaram which proves detrimental to the wet cultivation of this Shrotriam — the wet crops are not sure of being harvested every year.

The dry lands are said to be of an inferior description, often made [illegible] as common with people and [illegible] [illegible] as stated by the Karnam. With all these disadvantages, I could not admit the Karnam's account and [illegible] the extent is defined I propose to charge Rs 2 — per acre upon the wet cultivation and Rs [illegible] per acre upon the dry cultivated and Rs [illegible] per acre upon the wet waste [illegible] [illegible] [illegible]
