 Totl. 8-

II This Wage consists of 8 equal Vultures they are engaged as shown in the margin. The loans are divided - The loans in the Wage are exchanged once in 6 years in the Wage

III The present area corresponds to that given in the account of 1724. The dimensions Talluel Junior and Gaulle with the boundaries which agree both with the Police
and with the account of 17246. However the area of 186 Acres is confirmed here -

IV. The person 1-243 of 1816 are the descendants of the Original Grantee. The person 1-2 was adopted by his father younger brother 38 years ago when the family was
= involved one. The father-in-law of the person 1-2 of 1816 purchased the land entered opposite to his name for \$490 from one of the descendants of the Original Grantee in 1895.
Bell of scale is on Stamp paper. The purchaser gave it as gift 13 years ago to his son-in-law the person 1-2 of 1816 on the occasion of the marriage of his Daughter.
Seller admits the transactions. Enjoyment proved.

The water is irrigated by two tanks. One is large & another is small. It is fed by single stream. The Mahajans purchased water from those of the neighbouring villages when they thought it necessary. About the large extent of waste lands, I questioned the Mahajans. They said that there were no waste lands of long extent in this village & that their classed as waste are cultivated occasionally. To this effect they wrote a remark on the Register. The furrows sown put out of the soil are of immense real waste & the rest are full tilled annually. I.C.

Water of Gout Salug, per acre
 Maximum Minimum
 Dry 3-9-9
 Wet 10-13-3

Average rate of Gout Salug, per acre
 Dry 1-5-6
 Wet 2-6-1

Details of average income of the last 15 years of the Gout Salug in wet lands
 in the Salug of Luchal-

From 1858 to 1870	Cultivated area in acres	Grass cultivated	of which Gout Salug's share at 40 per cent	Average prices of grain in 1870	Value of the quantity of grain in 1870	Water per acre
1858-1870	37069	153847	61536-12	2-10-6	163462-1	4-6-8

Dry rate prevailing in Gout Salug
 Maximum Minimum
 1-13-6 4-6

About 10 acres are cultivated annually & some with wet crops - Security of water is felt more & more
 The Dry & Wet Land of a superior quality generally - On the whole, the cultivation is carried on
 to a great extent in this village - The average net profits of the Village are 88-9-9 Maximum 100-0-0
 - is added, the income rises to 140-0-0 - This is not very low - This is somewhat fair - With reference
 to the possibility of soil in I from the subvaluation with the aid of the Metamorphosis is following
 The many small water figures also assisted me in framing the Valuation to a great extent -

(Cultivation) Wet 19 acres & 3 per acre 57-0-0
 Occasional Water 2-30-1/2 1-10-2 1-10-2 1-10-2 1-10-2
 118-0-0
 Dry 19 acres & 3 per acre 57-0-0
 118-0-0
 114-2-0-0

Revenue 30563
 Maximum 100-0-0
 Minimum 4-6
