There is some exaggeration in the matter - Wet lands are not full watered & hence -
Wet & Dry soil is of a medium product generally. Harvest is moderate -
I have no materials to estimate the average ^{value} assessment of the adjacent open lands -

The average dry amount of the adjacent *cyperus* lands is 12 lbs. per acre.

The average income of the Village as per statement of the Mahajan is 60 rupees per annum.

In considering the fertility given to, I give, the valuation of the Village as follows -

Oct 30 sum of 120 p^{ts} water annually at 60 p^{ts} per acre - 120 -

Oct 21 from Matthews, Wash. to 20 Paper per an 42

70 lbs of Dry Sulphuric acid 12 lbs per acre ————— 52-8

41 Ann of Day Metherland, White & al $\frac{1}{2}$ of 100 per cent 10. 10
