Wet Salug per acre - It is fed by the tank of the village of Valandara. The tank is owned by the supplying channel is an influential one. The Mahajanams are among the Mahajanams. They own state that in all the Mahajanams are in friendly terms now all the lands will be brought under plough. It is true that some of the lands are left waste from the dispute but not to such an extent as is said by the Mahajanams. The tank is of a superior quality generally. It is a valuable property but it is somewhat in a dilapidated state. It is among the Mahajanams. In the absence of dispute, the lands will be security left uncultivated. The average profits of the village as per statement of the Mahajanams are 215-8. Of this, if the rate of 1872 is taken, a total of 75-0 is arrived at. This is quite false & unfair.
