

Register of Stroudgum Valley of Arugudi in the Ramnad Taluk in the Zamindari Estate.
Arugudi alias Jagannadapuram

I. This is one of the Darnasamam Villages situated within the limits of the Zamindari of Ramnad at a distance of 12 miles from Subah Ramnad in South Western direction - This was granted in A.D. 1787 by Muttu Rama Linga Vengaya Raghunada Subbaya Katta Desai, one of the ancestors of the present Zamindar, to one Tenn Vengaya Gungar for subsistence. This is a hereditary grant. This is in uninterrupted possession of its holders since the date of the grant. This has a Landed on Copper plate. It bears the seal and signature - As usual it bears the name of God - The grant is supported by the accounts entered in p. 12. The present holder of the Village is a descendant of the Original Grantee.

II. The present area corresponds with that given in the statement now produced by the person of 16. The Valued Jins no fault with the boundaries. Hence the area of 63 Acre & 40 Guntas is confirmed here. The account of 1211 was not prepared on mere guess but upon a rough measurement. The person of 16 says that he has not more land than 63 1/2 Acre. The figures of 4 are deduced from the Register produced by the person of 16. & compared with the accounts entered in p. 12.

III. Wet lands depend upon a small tank. Some of the lands depend upon accidental sources of irrigation - Waste is cultivated ^{occasionally}. The soil is of a medium character & of saline nature. The dry lands are of an immemorial waste - The soil is of an inferior quality. But the person of 16 says that these lands are fit to be cultivated & that they are not like the plain of Ramnad. Wet lands are not cultivated & hence the person of 16 are 60 - 13 - 7 - as per statement. This is not very low - But not altogether free from faults. It is true & I admit that the lands in this part of the Country are not fertile. Fertility of Water is felt to some extent. The average rates of the Govt. Taluq of the Zamindar on Wet lands are given on the back of this Register. The rate is payable with reference to the nature of season. It is a permanent Tax. In consideration of the fertility of the soil & maximum & minimum rates of Govt. Taluq & the average rates of the Zamindar, I gave the valuation as follows -

Wet Waste 31 1/2 Acre at 2 A. per Acre = 3-15
 Dry Waste 31 1/2 Acre at 2 A. per Acre = 3-15
 Total 63-00
