

Chinna Kannamgudi

I. This is one of the Dammasanam Villages in the pemonary of Pannam granted by the pemonary of 11 to the person of 300 AD 1742 for subsistence. This is a hereditary grant. This is in uninterrupted possession of its holders since the date of the grant. This is a Patta on Copper Plate. It was not registered under Regulation XXXI of 1802. This grant is supported by the accounts in folio 12. This Village is now Hamlet in Hamlets. This Village is enjoyed by the person of 16 who is a descendant of the Only and Granted.

II. The present area of the Village corresponds to that given in the account of 1721. The pemonary of 11 is in full with the boundaries, which agree with those in the account of 1724 & with those in the Copper Plate. Hence the area of 34 1/2 Acres is registered here.

III. Wet lands in the Village depend upon a small Tank. This is a depopulated Village. The person of 16 that now possess the wet lands is unfit for cultivation but from want of water some of them are left waste now & then. Some of these lands are cultivated 2 times occasionally. Wet lands are of a medium character. Paddy lands are of the same description. The whole is not of an immemorial nature. The person of 16 says that the waste is full of trees since the last 10 years & that he intends it a waste by clearing them. Previous to 1898 he says the waste was grown up with Selam trees. No Vambore is raised in this Village. The arrangement of the Village in 1898 as per statement of the person of 16. This is not true. The arrangement of the Village as per the order of the Govt as well as pemonary Taluqs are given on the back of this Register. Work of water is much left. The soil is not of a superior quality generally. The result of my detailed enquiry shows that the valuation of the Village stands thus - if calculated very liberally.
