On 1st day of June 1880 the lands entire off-site. 5 the person of 2 to 3
on the ground that his father mortgaged the land in the year 1800 or 1810
to one Pringarama Ramaswamy, who sold the same to the father of the person of 2 to 3
claimant that what he said he does not know - The claimant produced
a document drawn up on a plain paper leaf, purporting to be an agreement
executed to his father by the mortgagee. The genuineness of this document is not proved
It is proved that the father of the claimant sold the land to the father of the Defendant
but father of the claimant says that the latter are enjoying the land since
- The claimant is of 46 years old - He says that neither he, nor his father, enjoyed the land nor did
for him in the day. The defendant generally prefer false complaints to extort money
from their dependants & waste the time of the settlement officer. If these lands
were really in mortgage the claimant would not have kept himself silent so long
without demanding for them -

Valentia

III Wet lands depend upon our tank of moderate size - It is not in thorough repair -
It is fed by single stream - The village complains that their lands are washed away
from the flood of Rajnagar Kaveri, which runs by this village -
They again say that the dry & white lands placed as waste are not of long undisturbed land
- They are full water when they are not injured from the flood of the river, but all the lands are under
since the last years as the rains are not heavy & that there is no complaint that these lands are
cultivated annually - It seems to be true to some extent from the evidence of the adjacent village
Nanjat & Rajnagar lands are of a good quality generally - Scarcely of water is not felt
- Wet lands are not full water 2 times - I have no materials to determine the average wet assessment
of the adjacent village - The average dry assessment of the adjacent village comes to 9
- Ave - No Tambore is raised in this village - The average income of the village is not stated by the
- is 40 Rupees per annum - This is not true - An average value of the fertility of soil of 2 1/2
- valuation of the village as follows - 20 being white full water annually at 3 1/2 Rupees per acre
- 17 being dark soil at 10 Rupees per acre
- 6 being dry at 9 Rupees per acre
