Salicaria

1. Wet. Cows depend on one Tank of moderate size - It is covered in strong the -
- It is fed by the Tanks in the adjacent Villages - The Tank is filled annually -
- The person N 1 & the Tank of the person N 2 of 18 says that the Wet. Cows pleased as
- waste are Mattakkad & that the Dry Cows are of 10 years waste - from want of crops & so on
- There is some exaggeration in the matter as usual - The surrounding Villages are well flourishing
- state - Wet. Cows are full of water occasionally annually to 1/8 or 1/4 of the area - Generally
- Water is felt rarely - Tambic is not raised - Soil is of a medium character - - - - -
- The surrounding Villages are well flourishing state -

Water is felt rarely - Vambric is not raised - Soil is good (small)
There are also some good lands - also - The Village also is in flourishing state -
The Manager of the peninsula (Mr. J. P. B.) just purchased the lands in the Village
He will improve it to a vast extent - I have no materials to enter here the average
- assessment of the adjacent Syria lands but are settled on sharing system The average
of the lands in the Village of Romken are at 0.11 3/4 per acre

The average ~~the~~ income of the Village is per statement of the Village as prepared and
 90-100 per cent. This is not true. The account of the Village as prepared and
 by the 1st of 16. He would not allow the 1st of 16. He would not allow the 1st of 16. He would not allow the 1st of 16.
 truth go out regarding the income of the Village. With reference to the 1st of 16. He would not allow the 1st of 16.
 I frame the valuation as follows.
 Val 51. Per cent 30 per cent 153
 56 72

Wet 57 Per cent 3 ppe per acre 153
 Dry 109 pper cent $\frac{1}{2}$ ppe per acre 54 12
 Total 207 12 0
