Thomsam
Division

1 This is one of the Thomsasams in the Goundary of Ramnad. It was granted by the Ponnaiya King in 1011 to the person of 103 villages & other villages on one & the same date for subsistence. These villages now form the Taluq of Parunguram. This is a land grant. This is in uninterrupted possession of the holders since the date of the grant. This has no Polla. It is said in the Ponnaiya account of A.D. 1815 that the Polla of 96 villages is full on a stone in the village of Kallangulam. The holders of the villages now are about 100. The Thomsasam is supported by the accounts of 1012. No. 10. Taken about the area or about the boundaries on the part of the village. Hence the area of 64. A.D. 1815 is confirmed here. This is omitted from the British Register erroneously. The persons are not the holders of the village. They are the principal shareholders in the name of the 96 villages composing the Taluq of Parunguram. The persons of 16 are descendants of the Original Grantee but as this is an ancient grant, the persons of 16 are unable to describe the relationship existing between themselves & the 1013. However it is proved by tradition that the persons of 16 are descendants of the Original Grantee. The persons of the village are undivided & they are engaged as chowdars in the margin. Ponnai is paid on the number of the persons equally. The persons of 16 are divided brothers.

2 The lands depend upon a Tank of small size. It is fed by a small stream. The Tank & the lands are as waste or "all attached". The lands depend upon a Tank of small size. It is fed by a small stream. The Tank & the lands are as waste or "all attached".

3 The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated.

4 The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated.

5 The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated.

6 The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated.

7 The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated.

8 The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated. The lands are of a medium quality. The lands are not cultivated.
