- In proof of this they produced a document purporting to be copy of an Inscription on a stone in the Village - more settlement. They again plead that they don't know who.
- are the persons of 13 & 15 - (Whoever may be the Original Grantee)
- it is proved by documents that some of the fees of 016 are standing shareholders in the Village - I don't consider that they will permit strangers to take up the lands in the Village - without proper right in hand - Thus the right of all the 016 is satisfactorily established in the District where the former Grants are as defective - Now it is left but to depend on mere tradition & -

1 One Chettiar was in possession of the lands entered off in the

- & the persons of 5 & 6 on the ground that he mortgaged the lands - about 20 years ago to one Thambalatewarar, one of his - the lands to one Affadhe rana Gurulal & later Affadhe rana - relation, the persons of 2-3 & 4 of 16 are now in possession - in ascending - the first 2-3 & 4 of 16 are now in possession -

the mortgage bond - It is proved that the mortgage bond is now in the possession of the mortgagee -

2nd sheet of the Dammanam & Kappagudi in Ramnad & Ramanathapuram.

- Put Subbajiam son of the aforesaid Venkateswarin in the Village of 10 of a Vally & that he sold it in AD 1860 to the p^r of 5th of 0th 1860 -
 - for Rs 153-2- under a bill of sale drawn up on a stamped paper. The purchase money given for the land to our Affordamara & Gurukel -
 - Hence the claim is rejected & the party is referred to civil court.

Valuation

Wet lands depend upon one Tank of moderate size - It is in repair - It is fed by the Tank of the Dammanam Village of Pandamangalam in Periyar -
 - Remains dry by Temple Streams - The Mahajannams say that the wet lands (called as waste are 10 years unencultivated lands - & that the Dry lands
 - are of 20 years waste from a dispute between the & its many abounding villages - I cannot believe this - Some of the lands may be waste - Half of the wet lands are
 - 2nd times generally as admitted by the Mahajannams themselves - ^{of a medium character still} - There are in detail some superior & inferior lands -
 - Punjab lands are cultivated with Vengay & the Village is in good state - Scarcity of water is felt in some years - Tank is not raised in the Village
 - There are no materials to enter into the average profits of the adjacent open villages - The average assessment of the Village in which the Village is situated -
 - is given in the 2nd side of the Register - The average Dry assessment of the Village varies from 1115 to 1119 per Ann - Average profits of the Village
 - are 140-2- as per the terms of the Mahajannams - In consideration of the fertility of soil &c, I frame the valuation of the Village as follows -
 with the aid of the Mahajannams

Wet 50 Acres cultivated annually in full & partly 2 nd times at	200	
40 p ^r per Ann	22	
Wet 11 Acres waste &c at 20 p ^r per Ann	222	
Dry 40 Acres cultivated annually at 12 p ^r per Ann	30	
Dry 48 Acres waste &c at 4 p ^r per Ann	12	42
