I regret prevailing in the Zamindary Soling of Ramoukata

Mark this

Hand Copied

(Continued from page 1) The lands in the Taluq have been partly divided & partly united.
The lands are not exchanged periodically. Pimpus find on the number of the lands and on the
No Taluq about the bounding of the Taluq on the part of Rang's Taluq & the lands
correspond to those in the account of 1724-6 - which the Rang's Taluq both as his & generally

Valuation

The persons of 186 say that the lands are irrigated by one small tank, that is of 10 per cent
a little area known by the name of Rangwada Parang - but the tank breaks annually since
ago from the floods of the stream, that 3 or 4 acres of it are cultivated and personally
the last 7 or 8 years or that the lands are cultivated as a whole - I perfectly
most of the lands in the Taluq of Ramoukata in which the Derasanama
I found them to be of superior quality - The results of my enquiry go to prove
the statement of the 186 is true to some extent & not to its full extent. And one
The ultimate result of the 186 shows that all the arable lands are
cultivated, that half of the total area is cultivated annually in a
to 1/2 of Dry area & that the rest is cultivated as a whole - Soil is not
superior quality. The lands are not cultivated & hence scarcity of water
as the 186 plead that the Village is languished by the floods of the stream
The neighbouring Villages are in flourishing state - This Village is
state - I have no materials to counter the average assessment of the
Wet lands. The average Dry rate of the contiguous Open Village (Derasanama)
is at 5 1/2 per acre - The average income of the Village is per acre
the 186 are at 25 per annum. This is not true - With reference
fertility of soil & I frame the valuation of the Village as follows -

Wet 5 acres at 30 per acre 150
Wet 5 1/2 acres at 20 per acre 110
Dry 100 acres at 11 per acre 1100
Dry 100 acres at 1/2 per acre 50
Dry 100 acres at 1/4 per acre 25
Total 1735

I charged 5 per cent of the 1735 as 86.75
per acre is 1735 per acre & 86.75 per acre is 1735 per acre
I charged 5 per cent of the 1735 as 86.75 per acre
100 acres at 1/2 per acre 50
100 acres at 1/4 per acre 25
