1 One Sivarama Linga Sastri of Cunniff No 11 of 086 on the ground that it is the property of Sivaraman, the son of father & mother of his son - & that it was mortgaged by the said Sivaraman & Linga Sastri 40 years ago & 35 years ago respectively. The said Sivaraman is the son of younger brother of Father-in-law of the Widow No 11 of 086. The plaintiff failed to prove the fact of mortgage. He admits himself that he never married the daughter of Sivaraman but the transaction of mortgage took place & states that he heard of the lands having been mortgaged by Sivaraman. It is proved also further that the Father-in-law of the Widow No 11 of 086 was engaged in business & that on the eve of his death he mortgaged the lands about 30 years ago to the plaintiff No 11 of 086 & that the lands are still under mortgage. Hence the claim is rejected & the case is referred to Civil Court. Again the Plaintiff Sivaramalinga Sastri produced a document so far back as 1788, ~~and~~ showing that ^{the} ~~in fact the land was sold to him~~ the father & younger brother of the Father-in-law of the Widow No 11 of 086. The genuineness of the document is more than proved. Even if the document were genuine, it is of no use to the Plaintiff as the lands fell in possession of the Father-in-law of the Widow No 11 of 086 long ago.

Valuation

Wet lands depend upon a large Tank. It is fed by Parulayar - The Tank is in repair - The Madhyamam says that
- Wet & Dry lands (classed as waste) are 5 or 6 years unwatered lands. The result of an emergency goes to prove that this is not
true to its full extent - Wet lands are not cultivated 2 times in any given year as of a medium character generally -
Security of Water is not much felt - The Tank is filled annually in ordinary seasons. There are no tanks to extent
the average, amounting to the neighbouring wet lands that are settled on sharing systems - The Dry (to the
contiguous) Open Village of the only annual & Pullenayabab of 700 per acre. Average profits of the Village
per acre of the Madhyamam are 1350 per annum. In consideration of the fertility of the soil in 7 frames
valuation of the Village as follows: Wet 46 Acres & 3 Open per acre 138 -
Dry 105 Acres cultivated at 1400 per acre 14700
Total 151 Acres at 1400 per acre 21140
