K. J. L.

It is proved by the depositions that the lands have been conveyed to the father-in-law of the Plaintiff's persons N^o 21 & 25 of 1816 was done by the deceased widow, that they are still in mortgage with the persons N^o 21 & 25 of 1816; that the persons N^o 50 performed her funeral rites & that she gave the lands to the persons N^o 50 in gift - but no documents. The depositions admit all these facts unimpeachably, hence I reject the claim of the persons N^o 21 & 25 of 1816. I refuse them to find. The father-in-law of the persons N^o 21 & 25 was a distant - divided person of the widow & took no care of the deceased widow - The persons N^o 50 were not a legal heir of the deceased but she received the lands directly from the widow - who was rightful owner & performed her funeral rites & took care of her when she was alive - Hence his claims cannot be enforced by those of the persons N^o 21 & 25 of 1816.

1 The person N^o 9 argued ^{that} he was entitled to his father's younger brother in ch^d D^r 1856
as a heir and his successor. He was testimony by the above as before soon after the death
in ch^d 1850. The property was transferred to the person N^o 9 ^{the person N^o 9}
on a plain paper. ^{The person N^o 9} The person N^o 9, the younger brother of the deceased pleads that
the person N^o 9 has no right to the property. The Supreme Court of Pennsylvania
passed a decree in favour of the person N^o 9 in suit d^t 1857.
confirmed by the first court in appeal suit N^o 19 of 1858.
says that the matter is in appeal before the High Court.

Valuation

1 Well lands are irrigated by 3 Tanks. One is large & two are small. They are fed by the large Tank of Rasingamangalam. The Tanks are covered & the supplying channel is an influential one. The Tank is filled annually some in most unfavourable seasons. The Mahajans of Classes 128 are glad & 98 share of Dry as waste & state that they are "Matted Kad" or lands cultivated occasionally. This is first rate village & Darnasaram in the Rameswaram. I know this from my personal experience & active enquiries. I am satisfied myself from the statement of the Mahajans themselves that there will be little or no waste in ordinary seasons in the Village & that most of the lands are cultivated annually some 20 or 25 acres. This is a known fact throughout the whole of the Rameswaram. The large Tank which supplies water to the Darnasaram Tank is a very influential Tank which is fed by the two rivers Vaypaya & Chinnamuttur. The Agency under the large Tank is 10000 Rattam of seed land. Generally some of the lands are cultivated 2 times. The Mahajans 30 or 40 Rattam of seed land are cultivated annually but some fast & some produce harvest. Scarcity of water is not much felt in the Village. Most of the dry lands are cultivated annually but as the lands are fertile that cultivation attracts much the attention of the cultivators. Hence some of the Dry lands are left waste. The price is raised in some of the lands that is 2 or 3 acres. The Mahajans say that the cost of their village is such that the lands produce good harvest in the seasons when the rains are scarce. Such is a superior quality. The average profits of the Village, with all these advantages as per statement of the Mahajans are 685 Rupees. Of this of the 200 of Rupees 202 is minimum charges of 1000 Rupees making a total of Rupees 382 is deducted, the net profits are 303 Rupees. This is not true as usual. It is quite false that the Mahajans are spending 1000 Rupees annually on account of the repairs of Tanks. The average rates of Good as well as the Rameswaram Village Rasingamangalam in which the Darnasaram is situated are given on the back of the 1st sheet of the Register. The statement A will show that during the last 15 years an acre produced at 5 Rattam of grain & that a man was sold during that period at 213 Rupees per Rattam. Thus the melwarum is at 3 Rattam per acre. No Melwarum is levied in this Village as reported by the Mahajans. I calculate an acre is capable of producing 4 Rattam of grain. The leaves melwarum at 2 Rattam per acre. The charge of grain is 2 Rattam of 1/2 Rupee per Rattam. This brings at 1 1/2 Rupees per acre. I made every compensation for waste both by nature & by the cultivation of grain. For dry soil charge at 1/2 Rupee per acre as some of the lands are annually left waste from the negligence of the Mahajans. The surrounding minimum & maximum rates are given on the 2nd side of the 1st sheet. With reference to the above calculation which is recommended after much calculation I frame the value of the Village as follows -

Well 310 acres at 6 3/4 Rupees per acre - 1472-8-0

Dry 98 share of 3/4 000000 - 738-0-0

Total - 1546-8-0

The Mahajans expressed their satisfaction & agreed to the valuation. Register that they agreed to the 207160 Rupees.
