Wet lands depend upon one tank of moderate size - It is round in strength It is fed by Ingle Stream &c. There is a river Thuffa running close to the Dammassanum. The Mahagannans say that it does not supply water to their tank - The Mahagannans say that the Dry Waste is 40 or 50 Wet waste is of 100 years uncultivated land - from the poverty of soil &c. I ~~added~~ ^{thought} to them that if the Waste be really 100 years old, it might be transferred to or added with Drylands. They said that they are not fit for full water at all. It will be safe if I transfer them to Pannabokke or variable area - This being true I did so - Thus the arable Wet area is reduced to 30 Acres & 16 furl - They say that the Dry waste lands are an asset for full water - Now Wet lands that are full water annually are 30 Acres and 16 furl & the Dry is 12 Acres - Wet lands are not full watered & fine - Soil is of an inferior quality generally & they are lands are impregnated with salt &c. to some extent. No Timber is raised in this Village. I have no materials to take here the average rates of assessment of the neighbouring Wet lands & in fact there are no Dry lands close to this Dammassanum. In the adjacent of Kuttan Village, Drylands are ~~charged~~ ^{charged} at 6 Rs per acre. Average profits of the Village as per statement of the Mahagannans are 100 Rs per annum. In considering the fertility of soil &c. I frame the valuation of the Village as follows -

Wet 30 Acres at 3 Rs per acre	105
Dry 87 Acres at 1/4 Rs per acre	21-12
