C. As per acct of F^r 1211.

reduced from the statement & so papers
produced by the Mahajans,

Handwritten signature

II--The persons of 016 are not any way related to the Original Grantor. They are descendants of the person of 015. The Father of the Father of the Mother of the person of 01-2-3+6 of 016, who is the Grand Father of the Mother of the person of 015 & 6 of 016 purchased the entire Village in 1763-1765-1768 for 450 lbs on four occasions. One Bill of sale was lost & four are on plain paper leaves. Of course no evidence to prove the genuineness of these ancient documents. But the transactions are bona fide as the persons of 016 are related to the person of 015 & as they are enjoying the Village since long. - - - The lands in the Village ~~are~~ are undivided.

The Subsoil seems to be of the same nature as the surface soil. It is evident that there is not much water in the soil of a medium character generally. Also some superior lands. The Tanbore is raised on the whole the drainage is in flow running channels felt occasionally. I have not the details of the average rates of the adjacent cottonwood sharing systems. The average Dry & open Rivers are Kadooshed, many are at 1-23 per acre. (X)

(X) The statement A - then only
 - Cap. ab. dist. of root & in the T. of
 - After weighing the Cap. ab. dist.
