

II The late husband of the person at 2 of 106 Franklin Avenue, Boston, Mass. has been proved. Transactions proved to be a few years ago of the Original Prudential. Two Bills of exchange on the Prudential Insurance Co. are also -

III The area of that Tract is such that given in the account of 7211 by 9 Acres. The boundaries entered in the
Valuel. Hence the area of the Tract is confirmed to
IV. The Tract is defined upon a small Tract. It is given by the Devasagum Village of the language of 70 Acres. 35 Acres are
Cultivated & 8.36 out of 10 years waste. The 2 crop is not raised in wet lands. 72 Acres of Tract is left waste from time immemorial.
as per statement of the p. 11. The results going wrong go to prove that the water is not of such height as is given by the present order of the Village.

No 16. Remaawany Tenur, Sup. Gov. of the Dowry No 2 of 1816, granted 3/4 of the Village to her man a Rajanama ch
with a binding on her before the Subordinate Court of Madras in suit No 16 of 1819 - His Rajanama ch
confers power or authority upon the Dowry No 2, as was Plaintiff in the suit to sell or dispose of the property as she thought
proper. He is suing the 3/4 of the Village in 1819 - Now the Tenur pleads that the 3/4 of the Village should be registered
in his name on the ground that he will have to perform the general duties of the Dowry - His Rajanama ch also states
that there is no connection between the Dowry & the Tenur his plea is not complied with - Under the conditions
of the Rajanama ch 3/4 of the Village is registered in the name of the Dowry No 2 of 1816. It will be for the Tenur
to claim for the property on the death of his Plea, either if he thinks necessary -

Low ratio prevailing in Zennidary Salage

Minimum

1-2

Look is of a medium size to. Scarcity of Water is generally -
The average ratio of Good Salage as well as common Salage are given in the margin -
The net profits of the people as put in own statement are 65 pper. This is quite false -
From the valuation as follows -

Take that 30 acres or 30 Halls of Good land produces 150 Halls of Good Salage -
of good produce - Deduct from that half which leaves 75 Halls - The value of
the 75 Halls at 2 pper Hall (150 pper Hall for 100 Halls) comes to 150 pper
Deduct 75 pper Hall (150 pper Hall for 100 Halls) comes to 150 pper
The net profits are 150 pper - This is a very low calculation. For this it would appear that the net profits
obtained by the people are false - I give the details of the valuation as follows -

2950
