Fulcrum

(Set lands depend upon a Tank. It is fed by one of the channels of the river -
The Tank is round & the supplying channel is an unimproved one - The p^{rs} 16th say that
the 13th 1/2 acres of land planted as waste are of Mutturuttu - on the lands left waste occasionally -
No waste in Punjab lands - Soil is of a medium character generally - but lands are cultivated
2 times to a small extent occasionally - Scarcity of water is felt occasionally - On the whole the
Village is in a flourishing state. Net average profits of the Village are 88^{rs} - After, if the Govt
of 1862-63 & 1863-64 & Maximum rent charges of 105^{rs} making a total of 193^{rs} -
The net profits are 57^{rs} - This is not true - The statement A given in the margin will
show all the details - & hence I am not to dwell much here about valuation - I have
the valuation as follows after entering into much details with the Mahajanams -

Oct 20: Sent at $5\frac{1}{2}$ Duffies per acre - 70 -
