II Wet Cows depend upon a Tank. It is fed by one of the Channels of Vaigyan River. Approx. Amount
 of the period 016 = 72 of 600. 54 being Dry one fattened annually. At the rest occasionally once
 = 2 or 3 years - as it is stated. In this Country it is said that some of the lands are unfit to be cultivated
 = annually from want of fertility of soil. Soil is of a superior quality. It is mixed with all the others -
 This Village is on the banks of Vaigyan - one fourth of the lands are cultivated with & crops
 = occasionally - Turbine is not raised. Pumpkin or Pige crops are raised - On the whole this is a
 = one of the best Villages in the Territory of Ramnad - I see no defects in the Village. There is an
 = exaggeration in the extent of water claimed by the persons 016 - With all these advantages, the
 average profits of the Village as per statement of the Tank Keel of the year 013 are 342 - Rs per annum
 The average of Grain as well as grain and any other given in the margin. These rates are generally
 In consideration of the fertility of soil, I assume the reduction as shown below
 2000
