- don't know how their ancient appearance - Their long enjoyment is proved - The second appears that she acquires her clothes as well as her language - There is not a water buffalo - But so far is a single all the defects are left unmentioned
The troubles of the surrounding village

Whitcomb depends upon two Tanks. One is large & another is small. They are fed by Spring Streams & by the Tanks of the same name. The Tanks are in repair. Soil is of a superior quality generally. The Mohogians say that all the Dog's Well lands are not yet to be cultivated annually, from the poverty of soil & that therefore the Aug 1842 23 Ann of Dog are left waste occasionally. Many of the others marked as Good Land were regarded half century ago by the New Generation from unknown causes. The Mohogians say that they are paying Pence a bushel to this day for the land that was deemed & that the reserved lands are within their limits. Now the Good Land is cultivated annually by cash rents. These rents are paying annual to the generation. I think it is arbitrary on the part of the generation to make a reference to the Manager about this & await further reply for the disposal of Good Land.
