(Continued from 1st page) Wet Lands are irrigated by 3 Tanks. One is large & two are small. They catch
the Lohabai River water, which flows through the village & the Durgam River - One large & another small like
them 10 paces - These Tanks are filled in irregularly & sometimes they are found to be dry from drought.
- Wet Lands & 80 Acres of Dry Land are cultivated once in 3 or 4 years as the wheat &c. But the remaining lands are
annually or on average. Again they say that half of the Dry Waste lands of 80 Acres are of an immense soil water. It is true
in this part of the country all the lands are not fit for cultivation annually from want of fertility of soil - Wetlands are cultivated 1/5
once in two or three years Soil is not of a very superior quality. The lands are black in colour. The results of my enquiry go to prove that
there is not much exaggeration in waste lands reported by the Mahajanams. Famine is rare, it is said, in 6 or 7 years - No Panshi or Parsi
are raised in this Village - With all these advantages, the persons of 186 admitted the average profits of the Village are Rs. 439 - After
they deduct Rs. 157 for Zote & Rs. 95 for Tank repairs leaving net profits of Rs. 186 per Annum. Their own survey - I calculate the
value of the Village as shown below. I estimate that 139 Acres of Wet Cultivated land yields an outturn of 556 Tollen of grain at Rs. 1 Raller per Bire.
This survey low - Half of this is 278 Tollen - Melwani - The value of this at 2 Ases (very low) per Tollen is 556 Ases. To add the lawing at
5 Annas per Tollen of seed land 39 Ases. Then the income from wet land is 595 Ases. Dry Panshi process, at Rs. 1 per Acre, there are 50 Acres. Then the
gross profit comes to Rs. 633 Ases - I have calculated further in consideration of the expenses of the village - But are full of them -
Of this Rs. 652 Ases of the Zote 158 Ases & annual maintenance charges of Rs. 60 Ases, and Rs. 95 as stated by the Mahajanams. The average net
profits come to Rs. 455 Ases - This is a fair & liberal calculation as it is seen from the averages given in the margin &
Thus enter the value of the Village minus Maintenance Charges & inclusion of Zote 158 Ases as above - of 7 of the Register -
I am prepared the Village of the year 186 agreed to - H. Davidson Esq.
