

Nayiliranani 1049 D 27 0007

Register No 274
Sheet No 279

This is one of the Divadigam Village situated within the limits of the pendency of Ramnad. Half of the Village was granted in 1810 for the support of the Temple of Jagannath Swami in Tripullani otherwise called Darasimam & the remaining other half was granted in 1816 & previous to the same time support of the Temple of Veyulakonda Thirupattakam Swami in Tripullani. These are permanent Grants. No break in enjoyment. The Temple has apparently received Annually daily ceremonies are observed punctually. Hence these grants fall under Rule III of Clause one of the Code.

II. The present area of these Villages exceeds that given in the standard accounts by 28 Acres. This is very trifling. There two taluqs have only one boundary. But the lands are distinctly entered in the accounts. No Lallars of boundaries. The pendency Taluk passed them without giving faults with them. Hence the area of 28 Acres is confirmed being the actual Village. There two Pagodas have equal right in the Panambake lands.

III. Wet lands are irrigated by the tank in the Village of Panambake which also belongs to Darasimam Pagoda. The salt wet lands are left uncultivated since the last 20 years as per statement of the purnam from want of water. No waste lands in Panambake. Soil is of a superior quality generally. Wet lands are not cultivated to times. The average net profits of the Village are 548 per annum. If Porcup is added to it, the sum amounts to 678 per annum. This is a fair income. Hence the valuation is entered as 7 of the Register. There are two small tenants within the limits of the Village.
