

Valuation

IV. Wet lands depend upon one bank of moderate size. It is in perfect repair. It is fed by a single stream. The bank is high and well in ground. The Mshaganams say that the Dry (Wet) lands flourish as well as the Matted (Wet) lands. The last 10 years that they were under cultivation previous to 1810. This seems to be true to some extent. Wet lands are not cultivated & time. The Dry (Wet) land is not of a very superior quality generally. It is of a medium quality generally. Paddy is raised in it and is cultivated with Torago or the Village is in good state. I have no doubt that the entire here the average and Wet assessment of the adjacent Dry lands. The average rate of Dry assessment of the adjacent Dry lands does not exceed 12 Rs per acre. The average income of the Village as per statement of the Mshaganams is 250 Rupees per acre. This is not true. In consideration of the fertility of soil &c. I frame the valuation of the Village as follows with the aid of the Mshaganams.

Wet 100 acres cultivated at 3 Rs per acre 300

Wet 62 acres Waste, Matted (Wet) at 2 Rupees per acre 124

Total 424-0-0

Dry 200 acres cultivated at 17 Rs per acre 3400

Dry 160 acres Waste & Matted 4 Rs per acre 640

Total 4040

Total 4464-0-0
