1 These are the Villages granted for the support of the person of 183 by the Rangoon King of 1826 years ago -
 These grants being of a very old date, the ~~exact~~ exact dating the grants are not known. The first produced a Pottah written
 on Lagan paper dated 1555 or as far back as 225 years. This shows that only one Village Kallakurumbi was granted
 But the boundaries given in the Pottah embrace also the lands of "Ombadann Paly" These two Villages bear distinct
 numbers but they are entered in the accounts ^{still generally as} in a lump. In the account of 1811 the area was given distinctly - In the
 Lagan account of 1826 & in the English account of the same year, 1826, area & of these Villages are entered in a lump.
 Again in the account of 1826, the area of these Villages were entered in a lump. The lands of these two Villages have been
 divided into 24 Villages long ago - Hence these two Villages are brought under the Register as one Village -
 P. 111

The Lands are divided - No exchange of lands takes place. The Titles are permanent - Temporary
- running Titles are given or permanently - The present of area of the Village comprises an excess that gives in the account
of 720 by 58 acres. All these Lands are situated within the proper limits of the Village - The permission to sell gives no
to the boundaries - Hence the one of the Village is confirmed as

(Confidential) To this add the income from Purijah at 60¢ per acre - 434 papers - making a total of papers 12768. This is very liberal - The people say this is very obstinate - observing my calculations, the rate for 10¢ per acre comes to 5720. This is somewhat high on the whole though not in detail. I recommend at 30¢ per acre - 9440 papers for the whole area - Now the value comes to 50¢ per acre.

Sheet no. 962

1 The persons N^{os} 8 to 53 of 16 Their Grand Father purchased lands in A.D. 1831 for the purpose
- 140 - This of sale is on Kempt's paper Transaction is Bonded & enjoyment proved.
1 The person N^o 35-36-37 of 16 of Trinity of Cambridge entered opposite to M^o 26 of 16.
- He gave that his (N^o 26) eldest younger Brother Eschinger who died about 98
^{N^o 29 years ago}
years ago, borrowed some money from them & made an agreement to sell the said
= 1/4 share to him if he fails before the money without 3 years. Reproduced the same agree-
ment which is on plain paper. The person N^o 26 pleads that he performed the funeral
rites of the deceased Eschinger & that he is his Mother's Brother & that he gave the 1/4 share
to him on the day of her death - No documents. Some of the Mahogany men say that the
deceased Eschinger did give the 1/4 share to the person N^o 26 of 16 & that they are now
the debt incurred by the person N^{os} 35-36-37. The 1/4 share is in mortgage to

Thompson & Co
N.Y.

The document produced by the persons N^o 35-36 & 37 is not a deed of sale.
 It is a constitutional agreement - Except one witness who attested the document
 died long ago. Even that one witness is not here - If the document were
 genuine, the persons N^o 35-37 would have taken possession of the land $\frac{1}{4}$ thirty
 or obtained a formal Bill of sale from the deceased who died long after the
 expiration of the time allowed to clear the debt - As this was not done
 that document is not a genuine one - Though the person N^o 26 is not a
 legal heir of the deceased, yet as it is proved that the deceased gave the $\frac{1}{4}$ thirty
 him, that the person N^o 26 performed his general rites & that he is now performing
 the annual ceremony of the deceased, I have registered the $\frac{1}{4}$ thirty as question
 in the name of the person N^o 26 & referred the parties to Civil Court -

Valuation

1 Wet lands depend upon 3 Tanks - One Tank is large & two are small - They are
 fed by one of the channels of Vayagur - The Tanks are in repair. The supplying
 channel is an important one. The Mahajamans say that the Wet & Dry Lands -
 claimed as waste are situated in the lower full water once in 3 or 4 years - or occasionally -
 This may be true to some extent though not to full extent - Soil is of a
 superior quality generally. It consists of Poppel, Pottel, Karsel. $\frac{1}{4}$ is Karsel
 $\frac{1}{4}$ is Pottel & $\frac{1}{4}$ is Poppel - They grow at least one full water & twice occasionally
 - Harvest is raised in one or 2 classes - annually - On the whole the village is in flourishing
 - state the average of good as well as genuine $\frac{1}{4}$ is given as follows
 - side of the first steel - These rates are somewhat high - Scarcity of water is felt in
 - some years - The labour full water of the 15 years given on the 2nd side of the
 - first ~~the~~ steel will show the fluctuations in their cultivation during the said
 - period - The average profits of the village as per statement of the Mahajamans
 - are 532 apers of the 2nd of apers 258 apers ~~the~~ & 227 apers net charge
 - of 27 apers and say a total of 285 apers are due when the net profits are 247 apers
 This is very low & unfair the statement is marked A entered in the 2nd side of the
 1st steel will show that on an average a Palla of good land produced in crops about 53 Palla
 6 Palla of grain the average prices of grain during that period are 370 - per Palla
 of grain. On this notion the income for an akre comes to 6 apers - This is high -
 3 Palla of grain for Palla good land - This includes $\frac{1}{4}$ of water
 222 Palla of good land given in crops outturn of 666 Palla of grain
 222 Palla of good land given in crops outturn of 666 Palla of grain
