I This one of the Villages in the jurisdiction of Raimon apurum. It was granted by Pizarro a Portuguese of all to the person of 1613 & others for
subsistence - This is a hereditary grant. There is an uninterrupted possession of its borders since the date of the grant. The said Village has a Poltine and owned over
~~some~~ a store in Moya found in Mocha Tabajo No. 1. I have about the Area or about the house series on the part of the game in
Valle. The boundaries correspond to those in the Account of 1724. It has the area of 132 Liro 882 fms. situated within the said limits.
is confirmed here - The Village consists of no shelter. The lands are enjoyed as chawa in the margin. The lands are divided Peruvian unity.
Poufui paid as chawa in the margin.

III The persons N^o 1 to 15 of 18 are descended along the Ogl. Grantee as proved by Tradition - They say that as several generations passed - between them & the Ogl. Grantee, they cannot describe their relationships - The ancestors of the person N^o 16 of 18, perished long ago. No documents remain - & as to the bonafide by the N^o 16 -

The persons A 34-5 & 6 of 16 furnished some of their lands in A 1858 for the purpose of the
-Ponnalagudi. The goal is on a plain jagged reef. Transaction proved to be bonafide. The village Ponnalagudi
goes to the Sundar's. But B. Ananta Subrahmanya, Tirunelveli

Valuation

The Well lands depend upon one small Tank - but is not enough to supply the water. The Tank is fed annually in rainy seasons. The Mithayamans say that the water is sufficient for the needs of the village. The lands are not fully watered 2 times. Kharif & Rabi lands are of a mixed character generally. The colour of the soil is black. No garden crops are raised in the village. The village is not in such a state as to be bought or sold. I have no materials to enter here the average land assessment of the adjacent Rabi villages. The average dry assessment of the adjacent villages is 10 Rs per acre. The average income of the village as per statement of the Mithayamans is 20 Rs per acre. This is quite untrue. In consideration of the above, I frame the valuation of the village as follows.

At 20 Rs per acre full watered annually at 20 Rs per acre 70
 At 5 1/4 Rs per acre full watered at 10 Rs per acre 37 1/2
 Dry 60 Rs per acre full watered at 20 Rs per acre 37 1/2
 Dry 10 1/4 Rs per acre full watered at 10 Rs per acre 7 3/4
