Register No. 51
Sheet No. 57

The area of the Village slightly exceeds that given in the account of \$211. The boundaries of the Village given in the appropriation of the same are correct. Since the area of 1807, as given is confirmed here.

III Rebell lands depend upon a small Tank. The Tank is fed by the Tank Channels of Pongam
- from the wealings of the Tank. The waste ports are full times occasionally - There are not full times & times - The lands much depend upon
Providential sources of irrigation. Soil is of a medium character generally - Scarcity of water is felt in some years. The District & particularly the
Pannaswamy is noted for drought. The average net profits of the Mahayans are Rs 200 7 1/2 per annum. Dry lands are full times annually to
an extent of 77 acres. Water is 915 years standing - as per statement of the Mahayans. As per statement of the Pannaswamy it is of 50 years water

I This is one of the Dammaramas in the peminariy of Ramadasapuram. This was granted by Pandara Pandya of 111 to Anantakrishnayyan & others in substance. This is a long term grant. This is an uninterrupted possession of its holders since the date of the grant. This has a Potta engraved on a stone in Alagar fort in Madurai taluk. The Dammarama is supported by all the accounts of 12. This is omitted from the long list - Account of A.D. 1855 copy of which is forwarded to the Board of Revenue. This is amenable. No Talk over about the Area or about the boundaries on the part of the peminariy Taluk. The boundaries now inserted in the vernacular statement correspond to those in the Account of 1264. Hence the area of 221 acres & 68 cents is confirmed here. These lands are situated within the proper limits of the Village - The Village consists of 2000. The lands are surveyed as shown in the margin. They were divided long ago. Pandya is paid as shown in the said margin.

II The persons of 16 are descendants of the Ogl. Grantee same persons of 3 & 4 of 16 & 18 & 19 of 16 who are alive - The descendants of the Ogl. grantee are unable to describe their relationship with the Ogl. Grantee as several generations passed between them. They are proved the descendants of the Ogl. Grantee by the tradition &c. The persons of 3 & 4 of 16 purchased their lands in A.D. 1855. Gov. Ruper of 16 from Alagar Pandya, descendant of the Ogl. Grantee. Bill of sale is on a plain paper long. Transaction proved the bonafide. Enjoyment proved. (This must add)

Wet lands depend upon our length of moderate size. It is not in Parangh riparian. It is fed by Jungle Stream. The water is filled annually & no scarcity of
 Water is fed in ordinary seasons. The Mahagunams say that 35 Acres of Wet & Dry are fullwatered annually & that 72 Acres flooded as wet waste, on fullwatered occasion
 with dry & wet crops & that 90 Acres flooded as Dry waste are fullwatered as Wetland. So far the Mahagunams are honest enough for not flooding lands at immense
 waste & Pommab's lands. However there is some suggestion that they are not fullwatered at times. No Taxation is raised. The Village is in
 state like the adjacent Ayer Villages. The Wet & Dry soil is of a very superior quality generally. The average income of the Village as far stated by the
 Mahagunams is 60 Ropes per annum. I have no materials to enter the average Wet assessment of the adjacent Ayer lands. The average Dry
 assessment of the adjacent Ayer Villages is 9 Ropes per acre. In consideration of the fertility of soil & I frame the valuation of the Village as follows -
 Wet 40 Acres fullwatered annually at 3/4 Ropes per acre - 30
 Dry 70 Acres fullwatered at 1/2 Ropes per acre - 35
