

Average rating of Great Salage insects
 Dry 1-5-6
 Wet 4-6-1

Situats of average in come of the last 15 years of the Zindoran
east land in Shikravan Taluq of Ramnagar

From 1256 to 1270	Cultivated area in acres	Grass cultures	Of which timber shrub & per cent	Average prices of grain	Value of the quantity of grain given in 1256	Rates per acre
1253 54-8-6+	29601-50	1427-26+	478 52-12-	31-10"	173466-6-1	6-14-11

Iny rates prevailing in Germany, Italy, & Palermo

1 The father & son of the person N 22-23 Dec 25 & 26 sold purchased land in 1835 for \$312 from the person N 1 & 2 of 16. The Bill is on plain paper.

1 The ~~son~~^{father} & son of the person N 27 purchased land in 1837 for \$19 1/2 - Bill is on plain paper. Transactions proved to be Bonafide

1 The person father of the persons n^o 39 of 16 numbered bonds in A.D. 1830 for Office 77-
Bill of sale in plain paper.

11 One Subachary the person's 1st of 1816 pleads that the Widow's 28 & 29 of 1816
= gave in R.D. 857 - 1/16 of 32nd Valley within Village in gift to her ^{father} & that the Widow's 28
pleads now that she never made the alienation - He produced the alleged deed of gift
which is one blank paper & one of the witnesses who are before me state that they
never signed nor attested the Document. The Widow's 28 is the daughter in law of the Widow
29. They divided their lands - The Widow's 28 says that she never made the alienation
while the widow's 29 who is the Daughter in law of the Widow's 28 & the daughter of the
Complainant's father admit her having made the alienation - The complainant has no
enjoyment of the lands - Hence the 1/32nd Valley of the Widow's 29 is registered in the name
of the father of the complainant & entered the father's first Court. I see no ground
to transfer any portion of the Widow's property of the Widow's 28 to the complainant or to
anyone else. The Widow's 29 will become void without enjoyment.

III. Wet lands depend on one tank. It is fed by the channel of "Gritasallabany" river. The tank is very low. Rain is an influential one. Soil is not of a very inferior quality. The Mahaganams say that 72 acres of the 860 acres of dry are left waste since the last 10 years from the inundation of the River. The mud going upping go to prove that there is much exaggeration in the matter. It would take time to improve ground if I could - about the Mahaganams accounts. Here I always collect information from the inhabitants of the neighbourhood to see how far the records of the Mahaganams are true. Some of the children are full grown & thus occasionally as the District is noted for drought. Scarcity of water is felt occasionally. There are 7 Madamams & not 10 as Mahaganams say. The tank is raised to some extent in one or 2 places. No Panyas is raised. Wet lands are of alluvium soil. The Mahaganams state that their average net profits are 238-12-7. Of this, if the loss of 69-4-8 & Mahaganams charges of 36-5-8 are deducted, the net profits are 134-12-7. The tank of the Mahaganams is not very low but not too full either. The price of the land is said to be 1/2 anna per acre as follows. The average rate of land as well as temporary lands are very high. Mahaganams are in the village at 10 Rs per acre.

(Cultivated) Wet - 70 Acres at 1/2 Panna per acre - 265
 uncultivated Wet - 12 do at 2 1/2 do do do do 30 -
 Diff (Cultivation) at 1/2 do do 45 do do do 228 -
 (uncultivated)

Total - 297-8-0
