Surge value of grain of Malabar on wet land
 in Alchiraman Salage of Revenue & Government

From \$1250 to \$1270	Cultivated area in acre	Gross output	Of which Government share at 40 per cent	Surge value of the quantity of grain in fact	Value per acre	Rate
R 1250	29801-50	142182-6	47852-12	3-10-	173466-6	5-14-

Dry rates prevailing in Government Salage of Alchiraman
 Max Min
 1-4-4 " 11-10

III----- Wet lands depend upon one tank. It is in repair. It is fed by a single stream -
 - The tank is fed annually. Scarcity of water is felt in some years -
 - The Malabarans say that the Wet & Dry lands planted as waste are partly cultivated & partly waste wasayanagar
 - Wet lands are not fully watered since Wet & Dry soil is not of a superior quality. It is of 2 -
 - medium & coarse generally. No garden crops are raised - The Village is in moderate state -
 - Harvest is moderate. I have no materials to determine the average wet assessment of the -
 - adjacent dry lands. The average Dry assessment of the adjacent Dry Village comes to 12 1/2 per acre -
 - ~~For example~~ The average income of the Village as per statement of the Malabarans is 180 Rupees -
 - per annum. This is very low - The Village is situated in a very good locality. I saw some of the Country jaguana
 - They are fertile. But the Malabarans being of a quarrelsome nature, they neglect in improving &
 - repairing the tank & in the consideration of the fertility of soil I frame the valuation of the Village -
 - as follows -

Wet 90 acres Cultivated once at 3 1/2 Rupees per acre - 315-0-0
 Wet 20 1/2 acres Cultivated once at 10 Rupees per acre - 207-12-0
 11-0-0 1/2 Rupees per acre - 262-8-0
 12-0-0 307-4-0 649-0-0
