Land 206-33

This is one of the villages in the Zamindari of Ramnagar. This was granted by Sundar Pongu to Ananta Kristnagar & others with 9 3/4%
Villages one & the same date for subsistence. There is a boundary grant. Patta of these 9 3/4% villages is engraved on a stone in Alegany fort in Madras.
No break in enjoyment. No talk over about the area or about the boundaries on the part of the Range Taluk. The boundaries correspond to those
in the account of 1724. Hence the area of 233 Acres & 33 futs is confirmed here.
The village consists of no Pongos. The lands are enjoyed & Pongu is paid as peshwa in the margin. The lands are divided from anciently long ago.
The holders of this village say that the several holdings were measured long ago.
The persons of 16 are descendants of the Ogl Grants as proved by the tradition & but the persons of 16 are unable to describe the relationship existing
between themselves & the Ogl Grants as several generations passed. The persons whose names are entered in p. 15 were not the holders of this village.
They were some of the principle shareholders in the some of the 9 3/4% villages forming Ramnagar at Taluk. Their names will be found in p. 15 of the Register.

The Wet lands depend upon one tank of moderate size - It is in repair - It is fed by jungle
Streams &c. The persons of 16 say that 52 acres of Wet-land as waste are of one or two years
- uncultivated lands & that they are fullwatered as Matt. Kud & that 55 acres of Dry-land as
- waste are Matt. Kud fullwatered once in 3 or 4 years - This is not to be depended upon much
From the verbal statements of the holders of the Village it is evident that there are no long
- uncultivated lands in this Village - Wet lands are not fullwatered 2 times in any year -
Wet & Dry soil is of a medium character generally - Dry soil may be ploughed with
Scarcity of water is not much felt for the Wet lands that are fullwatered annually -

No garden crops are raised - The average income of the Village as per statement of the people is
 "110 Rupees. This is not true at all - I have no materials to enter here the average assessment
 of the adjacent open Villages - The average ~~and~~ rates of the adjoining Dry lands vary from 1 ^{1/2} pice to
 12 Rs per Acre - In consideration of the above Circumstances I frame the valuation of the
 Village as follows -

- Wet 45 Acres full water annually at $3\frac{1}{2}$ coppers per acre - 15780. p 201.

At 6 1/4 hrs. - Matten and 2 cups for one - 32-8-

Total - 190-0-0.

Dry Gallonites annually 100 Ans. at 10% per An. - 100 -

Day 45 Amm. alternata 40 at 6 Pds per acre - 1674 -
