

Panna Kulam

! This one of the villages in the jurisdiction of Ramasapuram $\frac{3}{4}$ of the village is Agri or Dist Kavel & $\frac{1}{4}$ is Damasanam granted for the support of Anantakrishnagun & others. This is a hereditary grant. This is in uninterrupted possession of its holders since the date of the grant. This has a Potta engraved on a stone in the place of a seal in Madan Taluk. The Damasanam portion is supported by all the accounts of 1722. No talk was about the area or about the boundaries on the part of the jurisdiction Taluk. The boundaries now inserted in the revenue statement correspond to those in the account of 1726. Hence the area 340 Ams & 10 cents is confirmed here as the extent of the entire village. Of this $\frac{1}{4}$ belongs to the Damasanam portion. The Damasanam portion consists of no Pongors. The lands are enjoyed as shown in the margin.

II The persons of the are descendants of the Cogl Grantee. They say ^{that} as several generations passed between them & the Cogl Grantee, they are unable to describe their relationship here - It is proved by the tradition that they are descendants of the Cogl Grantee -

The person of 54 to 6 purchased the house in S D 1863 for \$385 - with some other lands in the
 village. from one Ladaga of a charge, who purchased them previously from one Easting in 1860
 The latter is a descendant of the original grantee Bill Graham on a stamped paper transaction - proved to be bona fide

Enjoyment proved -

Valuato 9/16 y 1/4 Darnasiam Village.

The lands depend upon one Tank - It is in repair. It is fed by Zungle Stream &
The Tank is filled annually. Scarcity of water is not felt generally - The Mahajanams say the 12th Acre
of water & 32 Acre of Dry of land as waste are cultivated. I found it quite impossible to get any
account from the Zemindars touching as the Manager of the Zamindary & others who purchased lands to a large
extent are quite unwilling to place before me any detailed account of cultivation, assessed &
Nangah & Rungah lands of the Village are of a medium fertility. Wet lands are not cultivated & 2 times -
The average income of the Village as per statement of the Mahajanams is 40 Rupees per annum.
In consideration of the fertility of soil &c. I frame the valuation of the Village as follows -
" 4 3/4 Rupees per acre - 58 -

Feb 6 new full moon anomaly at 3^{1/2} degrees over 38 — 622- 6272-

Wet 6 3/4	Ans Waste made 1 Paper per acre	1674-		
Dry 50	Ans full water at 9 cts per acre	6-2-	22-81	85-12-0
Dry 26 1/2	Ans Waste made 1 Paper per acre			

The contiguous Aspen Village
is Mandan in Pandory Valley.
The average dry assembly that
these comes 50 cts per acre
- R. B.
