Papagudi, (1) Vunayandavayal (2) & Abhishekapuram (3)

I These are the three Dharmasanams with the Zemindary of Ramnadpuram They were granted by the Zamindar in 1811 to the persons for whose benefit they were granted. There are no hereditary grants. There are no encumbrances upon the above Villages or upon any of them whatever. These Villages are supported by the accounts of 1812. These Villages were granted on one and the same date. In the Accounts of 1211 & 1215 these Villages are given in Lump. In the Boards Register of A.D 1815, Porupoo Dist is entered in Lump. Hence the three Villages are entered on one and the same Register at the request of the Zemindar's Vakeel. In the account of Fasly 1246 & 1246, the area of these 3 Villages are given distinctly. But some entries are not considered Bhi accurate. These Villages are contiguous to each other. The Lands are undivided. These 3 Villages contain 34 Vuttus & the extent of these 34 Vuttus amounts to 340 Kulies. Porupoo paid out the number of Vuttus equably & permanently. The Zemindar produced a Sunnud Certificate bearing the signature of the late Register of the Zillah Court, dated 22nd October 1809 shewing that the gift was registered in that Office. But it is not discernible from the said Certificate to what Village or to what Lands does that document relate. The person of 16 say that it relates to these three Villages under settlement. No Talkaran about the area or about the boundaries of the said Villages. Ranjo Vakeel Benecte area of 357 Acres is confirmed here. The boundaries are given separately for these 3 Villages now in vernacular Register & correspond with those entries in the account of Fasly 1246.

II The persons No 1-2-3-7-16 are Copareners descendants of the Original Grantee & others are aliences.

Valuation of the 3 Villages near Settlement –

Wet lands depend upon 3 Tanks – Of these one is large & two are small – In dependency of these there are 3 other small Tanks – All of these are supplied by Rainfall, & a few perennial Jungle Streams – The prop. of planted 64 Acres & Wet Waste & 99 Acres as Dry Waste & Waste but the latter are of long waste from want of cultivation – that all the lands are fit to be cultivated & that the waste will be brought under the plough gradually within 5 or 6 years – The Wet planted 265 Acres & Wet waste 265 Acres as cultivated lands – On enquiring thoroughly about the delay of waste lands, they sometimes mentioned that the waste are 265 Acres & that the cultivated are 94 Acres This is supported by the account which they had in their hands – This account is prepared at Rammad Jaffna settlement – Dry lands seem to be waste lands for about 15 or 20 years – Both Wet lands half of the lands planted as waste may be said as the remaining waste from want of cultivation – The Villages is in the hands of "Wet Malabar Settlers" – They will improve it very shortly – The neighbouring Villages are important ones – & these Villages inhabitants are in the habit of carrying on their business – Soil is of medium strength generally – In detail there are some gravelly & some inferior lands – Generally 20 or 25 Acres of Wet are cultivated 2d time – This year the Malayanans obtained 30 Acres of Wet — are cultivated 2d time – No Varabie is raised – The Villages is settled but it is not in a prosperous state from want of care on the part of the former holders of the same – The Tanks are ruined – They have good supplying Channels & good Bunds – Wet lands are cultivated 2 by 3 & 5 by 6 of the Varabie – Dry lands are lying waste though the soil is good – There is much room in the Villages for improvement by bringing Dry lands under plough & by improving the Tanks — Seventy Wet Acres & Dry Acres assessed – I have no intends to enter into the assessment of the adjacent Wet lands — Dry lands that are either on sloping ground – There are no — Dry lands in the Villages except the Dry ridges – However as the Dry lands are of long waste, I would charge the tenth etc of 4 Rds per acre – The Average income of the Villages as per statement of the Years 1806 & 1809 Rds 1600 – This is not taxed – In consideration of the fertility of soil &c, I premise the valuation as follows with Record of Rds 1600 –

Wet cultivation 100 Acres at 4 Rds per acre 400 —

Wet Waste (Jungle) 64 Acres at 2 0 0 0 128 —

Dry — 99 Acres at 1/4 Rds per acre ———— 24 12 —

Total — 552 – 12 – 0
