I. Wet lands depend upon one small tank. It is fed by Jungle Streams & by the tanks of the Devastanam Villages of Alengolam & Mottel. The Mahajanams state that 27 Acres of Waste are left uncultivated since the last 10 & 15 years from the weakness of the tank & that some of them are cultivated with Punjah or Dry grain. The Dry Waste, they say, is of 15 years standing. This is not true. The results of my enquiry into the ryots of the neighbouring Villages shew that a few Acres of Dry & Wet are left waste occasionally & not to such an extent as stated to be by the Mahajanams of the Agraharam under settlement. Soil is of not of a very superior quality. Wet lands are not cultivated 2d time. No Vanbore is raised. No fruit trees. The average net profits of the Mahajanams as per their own statement are 76 Rupees. This is rather low. The average rates of Govt as well as Zemindary Talugs are given above. Even if I should consider that these lands are of a very inferior quality, the valuation ~~or~~ comes as follows. I framed this valuation with the aid of the Mahajanams &c.
