□ The area of the village corresponds to that given in the account of July 1711 in the manuscript. The text need no objection to the consistency of the area of 1724. Hence the area of 22 acres is confirmed here. P. Havel and Havel.

-which agree between the account of 1846. Hence the area of 22 acres is confirmed here - ^{All} Hamilton no. 10-
III This entire village was purchased by the ^{All} Grand Father the person No 1 of 186 for Ppees 158 & 3 in 1803 from Ten Kateroa Egeen, Son of the
of 13 - Bull of exaction plain paper - The person No 1 his father younger brother's sons brought suits in the late Subordinate Court of Madras. The
the final Judge de follen decided that the person No 1 has right to half of the Village & said it was actually put in his possession & given up. The other
which was the share of the father younger brother and the person No 1 was sold in satisfaction of their debts in public auction, to the person No 2 of 186
320-9 - in 1856 He and Manamenger sold half of his share or one fourth of the Village to the person No 16 of 186 for Ppees 160 in A.D. 1857 - Person
or Kompan paper Transaction is bonafide - Enjoymnt proved - Transaction is Bonafide
^{All} It is not in reference to the whole land as full title is announced.

III... Well lands are irrigated by a single tank. It is fed by Jangle River. It is ~~not~~ ^{not} in repair. The Well lands are full of weeds. But 4 or 5 acres are left waste from inability to cultivate. Punjab lands are of 2 or 3 years waste. Soil is of a medium character generally. The Well lands are not full of weeds. The net profits of the Wages are 10-15 per annum. ^{old cost of water} This is quite false. With reference to the profits of well, I give the valuation as follows:

Scarcity of water is much felt.	Well 15 1/2 ch at 1/2 rupee a	48-8
	30 yds - 3.00 ch at 1/2 rupee a	012-2
