The price of 16 flans to one or by 3 flatters entered opposite to the
 Worn 11/16. Ref. 11/2/16 is a divided course of the Worn 11/2/16
 The Worn is enjoying 3 flatters from the time of her ancestor. The family was
 divided long ago. Hence the flans is rejected -
 - Valuation of the Pannamam portion

III Wet lands depend upon two Tanks viz One is large & another is small
 The Tanks are in repair to some extent. The Tanks are fed by Jungle Streams &c
 The supplying channels are in planted ones. The 11/16 says that 9 1/2 Acre of Wet
 & 160 Acre of Dry are of a few years watered. That they are just 5 Acre of Wet
 & that these lands are lying waste from want of care on the part of the
 The Pannamam is in very good state since the last 10 years. Some of the land
 are cultivated occasionally in some years. It appears there are small waste lands
 in the village about 70 or 80 Acre in Dry from the negligence of the town
 Village. The object of the mortgage seems to be to reduce the village
 into poverty, purchase it from the Mahaganam & then improve it. Part of it
 is a superior quality generally. It is detailed in folio. I have no materials to
 here the average income of the adjacent open lands. The Village is open to
 improvement. The average Dry rates of the neighbouring open Village of Valuvad
 Mahajan Mahaganam 11/3 per Acre. Average profits of the Village as per state
 the Mahaganam are 1/9 1/2 & the Divestment Pannam says that the income of the Pannam
 is 25 per Acre. These are not true. In consideration of the fertility of soil &c
 I promote the valuation as follows.

1238 Acre at 30 per Acre 37140
 Dry 90 Acre at 12 per Acre 1080
 Dry 160 Acre at 4 per Acre 640
 Total - 38660
