1 This is one of the villages in the German colony of Ramona. This was granted by the Germanian of 1811 to the person of 13 for subside value. The
a hereditary grant. This is in current untroubled possession of its holders since the date of the grant. This has a full and proper paper
This village is supported by the accounts of 1812. The village consists of 3 equal tracts. These are engaged as shown in the margin.
The area of the village corresponds to that given in the old accounts. The Germanian Valleys find no fault with the boundaries which
are agree to them in the account of 1845. Hence the area of 14 acres is confirmed here.
and 1862
The latter of the first 12.5.56 of 1866 further lands for 1865.

II. The ~~rest~~ of 16 are the descendants of the Original Patent - The father of this post is 1.
from one of the subscribers in the original Bill of subscription Stamp paper Transaction is Bonaparte - Enjoyment preserved.

III Wetlands depend upon a small tank. It is fed by one of the channels of Taigay river - In fact it is of a medium character & is full twice annually - Dry waste lands also are of the same description - Wet lands are not full twice a year - Soil is of a medium character & is full twice annually - The Mahajanas say that on an average during the last 10 years between 1860 & 1870 they were full twice annually - The soil is quite true - Average net profits of the Village as per statement of the H. O. B. are \$75 If Obrape or Lode is deducted, the net profits come to \$60 less - The average value of food as well as gamundiary taxes are given on the back of the Pergalain Rese averages are high & not suited to those funds - In consideration of the fertility of soil & I frame the resolution as above.

J. J. - 1877
