As an Englishman, I unreservedly & heartily
do so. Bullitt, the Dragoon, came here for the first time
in 1847, & was the first to settle in the country.

1 Wet lands depend upon
 - Channels of drainage
 - in repair - In fact the
 - Cultivated annually in
 - The last 10 years in
 - They are fine years ago they were left uncultivated as they are situated
 - in the bed of the tank. It is proved that there is much exaggeration in the
 - matter. The lands that are situated in the bed of the tank are full of water
 - they become dry - Hence the whole is placed on uncultivated lands. Wet lands
 - are full of water & land occasionally. Scarcity of water is felt occasionally.
 - Soil is of a superior quality generally. It is black in colour. **Rajasa**
 - **Rajasa** - There is raised in 10 acres. Pampuri is raised in the bed of
 - the tank. Average is raised in 10 acres. Mahaganams as per their own statement
 - are 2950 feet of them of the **Rajasa** of 121-60 & measurement
 - Charges of 25 apers making in whole 14666 is deducted, net profits
 - are 148-119 There is indeed very low & very unfair. The Village is in prosper
 - states. The average rule of food as well as secondary land are given
 - on the basis of the first sheet. With reference to the fertility of soil
 - I have the calculation as follows with the aid of the Mahaganams.
 - after entering into full details & guarding against arriving at the
 - ready conclusion -

166 (fuller) 131 Acres 3 1/2 Apers per acre 4588
 Dry lands 10 Acres at 150000 150000
 67260

Revenue of Rajasa
 13669 7/8

Note I found the Village as shown above -
 But the Mahaganams bitterly complained of it & requested some
 reduction in the valuation. Though I have explained the details of
 my valuation for house & house - On reconsideration of
 the matter, finding that 3 1/2 Apers per acre of land is somewhat
 high & hence I reduce the rate to 30 Apers per acre for the 10 Apers & 7 paces -
 This reduces the above valuation to 52150 Apers
